### **RESCON** urges federal action on immigration

The Residential Construction Council of Ontario (RESCON) has submitted a pre-budget brief to the federal government calling for more workers with skilled trades backgrounds to be allowed to immigrate to Canada.

Two other issues highlighted were the need to accelerate the harmonization of building codes and renew funding for municipal infrastructure projects, stated a recent release.

RESCON is calling on the federal government to increase the annual intake of skilled immigrants under the Ontario Immigrant Nominee Program (OINP) to 18,000 from 9,000, and also give greater autonomy to the provincial minister responsible for immigration to make it easier for Ontario to bring in immigrants who have specialized skill sets.

"The construction industry is a significant driver of Ontario's economy, employing more than 400,000 workers directly, along with creating another 600,000 to 800,000 jobs in the supply chain and industries that cater to construction workers," said RESCON president Richard Lyall in a statement. "The industry accounts for nearly eight per cent of the Ontario's GDP. It is critical that we take action to safeguard the construction industry, make sure employers have the resources they need to build housing and infrastructure, and that the rules and adequate funding are in place to keep the ball rolling."

Previously, a background paper prepared by the Ontario Skilled Trades Alliance (OSTA) stated while immigrants make up 24 per cent of the national labour force, only 18 per cent are in construction. Despite having sought-after skill sets, forconstruction workers are ranked low within the immigration system, the OSTA charged.

# Overbuild deck at CIBC Square a major engineering feat with careful execution

**DON WALL** STAFF WRITER

complex project with a unique vision for overcoming the great railway divide that separates Toronto's downtown office sector from the shadows of the Gardiner Expressway, the CIBC Square build on Bay Street is now past the halfway mark.

When concluded in 2024, the three-millionsquare-foot project from Ivanhoe Cambridge and Hines will feature two office towers at 81 and 141 Bay, 49 and 50 storeys respectively, a one-acre engineered park built over Toronto's rail corridor that will connect the towers, the new Union Station Bus Terminal built within the base of the project, a food hall and confer-

In addition, a pedestrian bridge connects directly to Scotiabank Arena as well as the underground PATH system and Union Sta-

The first tower at 81 Bay was launched in 2017 and completed last year, and work has started on 141 Bay. The bus station is complete and the overbuild park is close to wrapping up, ready to serve as a temporary laydown area accommodating cranes and materials as the second tower rises.

Hines managing director Alison Kimmel recounted that Ivanhoe Cambridge first conceived of the project 15 years ago, and Hines was brought in first as a consultant then became a development partner. EllisDon is the prime contractor.

"They had a decision where they could build a simple office tower, or they could really go for something much grander. That's the direction they chose," said Kimmel.

"To execute a project like this, with this type of complexity, one of these decade-pluslong projects, you really need to have a very strong team."

#### SUPERMETAL ERECTS THE OVERBUILD

In a project of firsts and superlatives - the project is seeking Platinum status for LEED, WIRED and WELL building standards, it represents renowned British architectural firm Wilkinson Eyre's first Toronto project, and it's the new headquarters for CIBC, the principal tenant - the overbuild is perhaps the most significant design and engineering feat.

Quebec-based steel fabricator and erector Supermetal was brought on to the overbuild job in 2020 with the job over half complete but

Contractor EllisDon was praised for keeping a safe jobsite during the pandemic as work proceeded on 81 Bay. Pictured: the project under construction.

a new design contemplated.

Supermetal project manager Anthony Tessaro described one constraint after another in outlining his firm's contribution. The team works five hours a night, when the tracks below are not in use, and every night the materials and equipment have to be hauled into place and then removed.

The overbuild as redesigned by Supermetal has no support columns so the custom girders manufactured and trucked from two Supermetal plants in Quebec are required to be massively strong - the largest are 20 tons and require two or three cranes to move each

Supermetal is building two decks, one below for maintenance and other uses and the top one for public enjoyment.

'The structure creates many, many design and constructability challenges," said Tessaro. See PROJECT, Pg. 3

Supermetal is confined to a narrow window to work each night, erecting massive girders at the CIBC Square overbuild site between midnight and 5 a.m.

# **Construction professional Dennis** John Hawley remembered by family

Dennis John Hawley

ST. CATHARINES, ONT. Dennis John Hawley, a construction professional from St. Catharines, Ont., passed away

peacefully at home on Feb. 10 at the age of 94. Hawley was married to the late Mary Hawley for 63 years. She passed away in 2017.

He married Barbara Lane on March 19, 2020. He was the father of five sons, grandfather to 10 and great grandfather to nine.

Cremation has taken place and a private family graveside service will be held in Markham, Ont. at a later date.

Memorial donations can be made to nonprofit charitable organizations For the Needy-Not the Greedy, Medical Equipment & Supplies of Niagara Falls or WEC International Canada of Hamilton.

Online donations and condolences may be made at CCBSCares.ca.

### Montreal Holocaust Museum announces plans for new facility

The Montreal Holocaust Museum has announced it is proceeding with construction of a new museum.

The facility will open in 2025 at 3535 Saint-Laurent Blvd. in the Plateau Mont-Royal borough of Montreal, stated a recent release.

The project is valued at \$80 million with contributions from the Quebec Ministry of Culture (\$20 million), the Azrieli Foundation (\$15 million) and

MONTREAL private donors.

The architecture firm selected for the design of the new museum will be announced in July 2022 following an international competition launched in the fall of 2021.

The new museum will feature exhibition spaces, classrooms, a 150-seat auditorium, a commemorative space and a memorial garden.

Museum president Richard Schnurbach stated, "The new museum will be

ideally located at the crossroads of the city's museum sector and the Quartier des spectacles entertainment hub, in the neighbourhood that once welcomed the Jewish immigrant commu-

"The choice of the former Jewish quarter takes on even more significance as it merges with the history of over 9,000 Holocaust survivors who rebuilt their lives here in Montreal."

# Community weighs in on Ontario Line design

Metrolinx recently launched a survey to collect public input on how the new Ontario Line and GO Expansion infrastructure will fit into the established Toronto neighbourhoods of Riverside, South Riverdale and Leslieville.

The online questionnaire, which closed at the end of October, focused on new retaining walls, noise barriers, underpass treatments and vegetative landscaping. Metrolinx received over 160 responses to the survey. In terms of ranking the design priorities for the new infrastructure, the survey participants prioritized reducing noise levels, protecting the tree canopy, introducing new trees and plants and minimizing the potential visual and physical impacts of transit service within the rail corridor, the Metrolinx blog states.

The following is some of the feedback received:

- Several survey participants preferred noise barriers made from a material that has the strongest noise-reducing benefit and noted the level of transparency should vary depending
- For both the future retaining and noise walls, participants

said they wanted Metrolinx to explore greenery and artwork to soften the visual impact of the new infrastructure.

- Accessibility, deterring vandalism and a desire for multiuse trails were the top priorities for the new green space Metrolinx is creating after construction is complete.
- As part of Ontario Line upgrades, new rail bridges at Eastern Avenue, Queen Street, Dundas Street and Logan Avenue will be built. Based on feedback from the community, Metrolinx is exploring architectural lighting that can be integrated into the underpass walls.
- Embankments and vertical green walls are being explored using evergreen and perennial plants for colourful vegetation in all seasons.
- For new trees, deciduous row and coniferous trees are the top choices selected by survey respondents to create a diverse species mix while providing greenery all year round.

# RAIC unveils new strategic plan during open forum

The Royal Architectural Institute of Canada (RAIC) has announced the development of a new strategic plan intended to guide the organization "to create a better world for all through inspired architecture in Canada."

The RAIC unveiled the plan at an open forum hosted by RAIC president John Brown in December.

Elements of the plan include:

Vision – a strong architectural com-

munity that is valued and empowered to create change;

- Mission to create a better world for all by empowering Canada's architectural community;
- Integrity being accountable, transparent and acting with high ethical standards in all work;
- Climate action counteracting cliof the climate crisis on people and com- and the built environment.
- Reconciliation building, rebuilding and strengthening the relationship with Indigenous people;
- Social justice creating a just culture that strives for social and spatial equity, embraces and respects inclusivity, fosters diversity and is accessible to all; and
- Innovation using creativity and design excellence to create thoughtful mate change and mitigating the impacts change in the architectural profession

# Soneil acquires two GTA industrial properties

Soneil Investments has announced the purchase of two Greater Toronto Area industrial properties for \$105 million.

The properties, acquired independently, are located at 8301 Keele St. in Vaughan and 1055 Clark Blvd. in Brampton. Cumulatively, the assets contain two multi-tenant buildings of over 465,000 square feet.

The company now tops \$1 billion in assets under management, stated a recent release.

Industrial has remained Soneil's largest investment asset class over the past two years.

"To grow from under \$100 million in 2017 to over \$1.0 billion today is a testament to our add-value growth strategy and ability to execute deals in a robust manner," stated Neil Jain, president and CEO of Soneil Investments, in a statement.

"As the industrial market has continued its unprecedented level of growth, we have been able to stay disciplined, pursuing only the assets we see potential in."

Soneil owns and manages industrial, office and retail space across the Greater Toronto Area. Their core strategy lies in investing in assets with stable returns and uncovering opportunities to extract significant value. Soneil continues to seek further opportunities to invest in real estate investments and developments, the release adds.

# Boxing as a metaphor for the construction industry

particularly boxing, to use as a metaphor for the study of a critical aspect of leadership, specifically the construction industry, may strike some as strange.

Even acknowledging serious failings in the sport of boxing in recent years, there are few activities that have played a more transcendent role in modern life than boxing. Few other sports over the decades touch big business and entertainment to the same extent.

Boxing is the great leveller and in this respect it is the most democratic of all sports.

In the words of Nelson Mandela, "Boxing is egalitarian. In the ring, rank, age, colour and wealth are irrelevant. When you are circling your opponent, probing strength and weakness, you are not thinking about his colour or social status."

Muhammad Ali would be considered as one of the greatest boxers of all time.

Sadly, Ali refused to retire at the high point of his career.

However, there is an ending to Ali's story that if not happy is at least bright and inspirational, and it is from this ending that we may draw our lessons about leadership, business and life in general.

Following his retirement from the ring, Ali pursued numerous business and philanthropic interests.

He also played a highly visible role as a fundraiser for medical research and treatment. He served as spokesperson for the National Parkinson Foundation until his death on June 3, 2016. He testified twice before Congress appealing for increased federal funding to find a cure for Parkinson's disease.

He sponsored the Muhammad Ali Parkinson Research Centre at the Barrow Neurological Institute and raised money for numerous Parkinson's related causes as well as muscular dystrophy and many other diseases.

In the later years, he spearheaded a campaign to raise \$70 million dollars for the Muhammad Ali Center, a four-level museum in his hometown of Louisville, Ken., dedicated to "helping young people understand they can be whatever they wish to be regardless of any obstacles."

As it applies to these difficult times that we are presently facing in business, Ali also survived because of his remarkable knack for reinventing himself.

During his boxing career

The choice of a sport, Ali never shunned controversy, but somehow through that process he learned the art of influencing people. Once a symbol of the racial tension that divided America, he became a symbol of the hope that these old differences may be put aside.

**Procurement Perspectives** Stephen Bauld

Old enemies have been won over and today he is one of the most widely liked and admired Americans of his generation.

None of this is to suggest that Ali is some sort of plaster saint. However, Ali provides conclusively that a leader need not forever be haunted by the ghosts of early and premature decline.

The construction industry is known for its great philanthropy.

Many fortunes have been made and donated to hospitals and many other organizations that benefit the citizens of so many parts of the world.

The construction industry is a welcoming community that some may describe as the lifeblood of the economy.

As in the case of boxing and Ali, the construction industry demands mental toughness, which requires positive thinking and positive action. It thrives on constant challenge and seeks out obstacles over which to triumph. Thus, it goes beyond a "can do" attitude.

It is the desire to seek out, confront and conquer adversity. A positive mental attitude builds character.

It requires an understanding that problems can be solved through hard work and creative thinking, perhaps not always, but certainly in enough cases to justify the effort whenever a crisis presents itself.

I am truly grateful to have been a small part of the construction family for the last 45 years and will continue to work hard in promoting a successful future for the industry.

Stephen Bauld is a government procurement expert and can be reached at swbauld@purchasingci. com. Some of his columns may contain excerpts from The Municipal Procurement Handbook published by Butterworths.

# Project co-ordination considered 'choreography'

Continued from Pg. 1

"The weights of the individual pieces are immense and having to construct such pieces in the middle of the night in a very small window presents its own challenges."

He described the co-ordination of the project with rail owner Metrolinx as "choreography."

"This is highly specialized, very heavy, very labour-intensive fabrication and very labour-intensive erection as well," said Tessaro, noting Supermetal has 20 draftspersons involved in the fabrication of each girder.

With the new structural design not yet finalized, a design-assist consultation was required and Supermetal worked closely with the structural engineer of record, RJC. Basic constructability was an issue, Tessaro said.

"So many of the fabricated pieces require special handling, special rigging, and they're so complex both in their balance and their centre of gravity. Lifting and installing them is an engineering feat on its own."

The Supermetal team is working with local unionized ironworkers and the overbuild will be completed late this winter with 1,300 tons of steel installed when all is done.

Supermetal is also working on the second tower.

Kimmel said given the complexity of the overbuild job, the construction schedule was front-loaded to allow for

"I think it came together very nicely," she said. "We're still kind of constructing the northern parts, but I think we know how to do it."

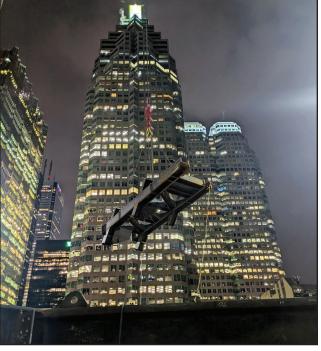

#### OFFICES IN THE POST-COVID ERA

The original completion schedule of 81 Bay called for a 2020 wrap. COVID, of course, affected scheduling but Kimmel said EllisDon and the other contractors did a great job of mitigating problems and the site remained safe through a very, very difficult time."

Kimmel said the pandemic will create a large distinction between the best assets and the not-so-great assets. It has proven that people can work from home, and so developers are required to build spaces that give workers a reason to come into the office to work.

"For us, that amenitization has always been a key focus of our developments," she said.

"The CIBC Square development is highly amenitized but beyond just the amenities, we've also really focused on building a sense of community. So I think you'll see that as we open our park, our food hall and the rest of the fitness

Each steel girder from Supermetal requires special rigging with constant attention to weight distribution and centre of gravity as it is installed on the CIBC Square site.

centres open, as all that kicks into gear."

CIBC originally planned to relocate more than 15,000 employees to the two buildings and Charlie Musgrave, a senior leasing director with Ivanhoe Cambridge, noted while CIBC remains committed to its initial obligations, the banker is still working through its back-to-work plan.

"It's unique times," said Musgrave.

"It is the onus of landlords to enhance and differentiate and optimize the experience within the office," he argued.

"I think there are some challenges and headwinds facing our industry. But what I think the overarching theme out of COVID is, average doesn't cut it anymore. You really need to push the envelope to differentiate your offering to your tenant partners."

Post-COVID, Musgrave said, the winners will be the landlords, property owners and managers of office real estate who create an elevated partnership with their tenants.

# Construction companies need to do their homework when choosing digital solutions

ANGELA GISMONDI

STAFF WRITER

nefore you decide what digital tools are a good fit for your company, you first need to ask yourself what you want to automate and why, says Stephanie Brown, a construction technology adviser and founder of Intelligent Construction Opportunities (ICO).

"Digital tools should enhance the facilitation of construction projects no differently than a hand tool or a piece of machinery," said Brown. "It is a tool that is supposed to function to change something to get to a particular outcome."

ICO provides the construction industry with services to systemize the evaluation of software, guiding contractors, project managers, commercial and residential construction stakeholders through the journey of buying the technology that aligns with business goals and budget, Brown said.

"It's not a Google search," she said. "A Google search starts to inform them about what's in the water, what's out there. But it's all in the details.

"I started Intelligent Construction Opportunities to align automation need, company workflows and project requirements from a vendor neutral perspective...to get away from a vendor bias, round peg, square hole mentality, and take a step back to strategically assess and ask how you do things now, and then work our way back to the potential technology."

It's also beneficial to get buy-in from the people who are going to be using the technology.

"Bring in a power user and bring in a dissenter or someone who is a curmudgeon as soon into the conversation as you can, because you must ultimately have the buy-in of people that there is something to automate," said Brown.

The COVID-19 pandemic has accelerated the adoption of digital tools and technology for many construction companies. Some people adopt the technology and others resist or are not comfortable with it, Brown said.

"You've got older generations of contractors and tradespeople that have been honing their skills for 20-plus years and have put in the time to have earned the designation of 'craftsperson," Brown explained.

"Then the digital world hits, pandemic or not, and some resist using an app to one finger type communications for the back office. Or they don't have time to wrestle with an app that requires multiple clicks and adds additional time away from their actual projects when they are already behind schedule. Or they haven't been properly trained to use software meant to record scans that might compromise the quality of their work otherwise."

Brown's background is in professional development for the software industry. When she began working on the technology development side of things, she consistently identified gaps in platform workflows unforeseen by software developers who often don't have related industry experience, she explained.

"Software developers often don't have real-life job context for the software they are designing," she said.

"Prospects don't always take the time to assess their own environment and business practices. This includes taking into consideration not just how they complete their projects but who is responsible for each stage of the project

"I was finding that there was very often a misalignment between the software workflows and the business practices contractors have relied on for years to complete their projects and most importantly have staked their reputations on."

So how do you choose the digital tools that are a good fit for your organization? Brown recommends evaluating the strategic goals and objectives of the company itself; understanding current business practices, systems and workflows; figuring out what they want to automate and why; determine the desired future state and the benefits you are looking to get from it; and establishing an evaluation criteria and list of requirements to shortlist the most appropriate solution for each

"That's how I start to source the particular software, based on those top level requirements and features," she

This Request for Proposals (the RFP) is an invitation by the Town of Bradford West Gwillimbury (the Town) to prospective proponents to submit proposals for the Renovation of 177 Church St., as further described in Section A of the RFP Particulars (Appendix D) (the Deliverables). In late 2020, the Town acquired the former Bradford Elementary School property. A 28,600 sq. ft. single-storey building situated on approximately three acres. The original building dates back to the 1950s with several additions. Town Council has approved the creation of a Community Hub with a vision to include social support services, skills development centre, not-for-profit offices, commercial kitchen, flex-use community space, meeting rooms, and other amenities. The Town seeks a qualified contractor to undertake the renovations and additions described in the tender specifications and associated drawings. 593 Dundas St W, Toronto, M5T 1H6

TENDERS DUE, 09-Mar-22 at 4:00 PM ET. Solicitation #: AP21-12

Owner: Toronto Community Housing Corporation -Procurement, 35 Carl Hall Rd, North York ON M3K 2B6 416-981-5500

CM: Deltera Inc, David Dawe, 4800 Dufferin St, North York ON M3H 5S9 416-736-8353 Fax: 416-661-

CM: Deltera Inc, Allicia Drew, 4800 Dufferin St, North York ON M3H 5S9 647-985-6384 Fax: 416-661-

8923 The Alexandra Park community is bounded by Dundas Street West, Queen Street West, Cameron Street and Augusta / Denison Avenues. When completed, the revitalization of the Alexandra Park community will see approximately 2,168 new and 396 refurbished residential units on approximately 7.3 hectares. The revitalization will introduce a mix of uses, tenures and incomes to create a more socially and economically robust neighbourhood that is fully integrated into the City's urban fabric. From 2013-2019 TCHC worked with their development partner, Tridel, to complete Phase 1 of the revitalization. In 2020, TCHC has again partnered with Tridel for Phase 2 of the revitalization which concerns the remainder of the lands at Alexandra Park, Phase 2A, the next sub-phase of development, is currently underway. Alex Park Phase 2A (Site 1 and Site 2) complex in its entirety is a twin tower, multiple occupancy, mixed-used development consisting of shared, below grade parking levels, podiums with retail and commercial daycare uses and 2 mid-rise residential towers. The extent of this Contract is bounded by the entire boundaries of both Site 1 and Site 2 where Site 1 is known as the MRKT Condo and Site 2 is known as Atkinson Apartment, Dundas Alexandra Park Residences Inc. is the owner of land known as Site 1 and TCHC is the owner of land known as Site 2. Deltera will be the Construction Manager for Alex Park Phase 2A project (Site 1 and Site 2) and is seeking a Contractor for the provision of Plumbing, Heating & Fire Protection services at Alexandra Park Phase 2A. The project will be awarded to the successful proponent with the highest, final and ranking Proposal and the project agreement will be entered with Dundas Alexandra Park Residences Inc. This work is categorized as Plumbing, Heating & Fire Protection work. Documents can be obtained at: https://www.torontohousing.ca/doing-business/ procurement-opportunities

Repro: Biddingo, 1210 Sheppard Ave, East, Suite 305, North York ON M2K 1E3

For the purpose of selecting a qualified construction management firm experienced in preconstruction services and construction management for the Project Horizon - Decanting and Early Works Projects. As an organization of the Broader Public Sector (BPS) and in compliance with the Supply Chain Directives, SickKids is requesting proposals for qualified construction management firms for

the Project Horizon - Decanting and Early Works Projects. Project Horizon is a multi-year phased redevelopment project to transform the delivery of paediatric care, meet growth needs and replace aging, outdated infrastructure. The Early Works Program will involve the renovation of approximately 436,000 CGSF of space to accommodate this phased construction within the Hospitals owned premises, as well offsite leased buildings, with a construction value up to \$400M. If interested, please refer to Biddingo.com to download SickKids "RFP# 2122-51-000 Project Horizon Construction Manager - Early Works" and all supporting documents for further information and instructions. Proponent deadline to submit clarification questions via Biddingo.com Clarification Request Deadline February 22, 2022. \*The project value listed reflects the total project estimate.

Geo Eng: Cambium Inc., Zhaochang Luo, 194 Sophia St, Peterborough ON K9H 1E5 705-741-4109 Fax: 705-742-7907

The City of Oshawa is looking to procure construction services for the redevelopment of two (2) parks: Cordova Valley Park, located at 811 Glen Street, Oshawa; and, Fenelon / Venus Park, located at 1230 Venus Crescent, Oshawa. The City reserves the right to award in whole (both Cordova Valley Park and Fenelon/Venus Park), or in part (Cordova Valley Park only). Fenelon / Venus Park may or may not be awarded, or may be awarded within 90 days of bid close. Scope of services within this project include mobilization, site layout and grading, excavation works, asphalt paving, cast-in-place concrete, playground and splashpad installation, site furnishings, utility connections including electrical servicing and water connection, sodding, seeding, and planting works. All work shall be in accordance with the terms, conditions, drawings, specifications, appendices, and attachments of this Request for Tender (R.F.T.). Bidders are to bid on each park in whole. Tender award will be based on the Schedule of Prices. The Provisional Schedule of Prices is optional work the City may or may not award. The tender will be awarded to the lowest compliant combined bid for both parks. The project sites are located at 811 Glen Street, Oshawa, and 1230 Venus Crescent, Oshawa. Work must be continuous from the project start date until project completion. The successful Contractor will be required to submit a detailed project schedule upon award of this Contract as well as interim schedules as required by the project manager and/or Contract administrator. Cordova Valley Park must be substantially complete by December 31, 2022. Fenelon / Venus Park is to be substantially complete by December 31, 2022 if awarded with Cordova Valley Park. Fenelon / Venus Park is to be substantially complete by June 15, 2023 if awarded subsequent to Cordova Valley Park. Civ Eng: AECOM Canada Ltd - Markham, Natalie Ioannides, 105 Commerce Valley Dr West, Thornhill ON L3T 7W3 905-747-7760 Fax: 905-886-9494

The City has identified a number of Stormwater Management (SWM) ponds requiring sediment removal, retrofit and/ or rehabilitation. SWM ponds have been constructed in the City of Markham as effective means of providing water quality improvements and flood mitigation in a watershed. With time, the accumulation of sediments in a SWM pond results in reduction of the pond capacity and consequently, reduction in pond efficiency. The sediment removal, retrofit and rehabilitation works for stormwater management ponds is consistent with the City's strategy to restore the treatment capacity (i.e. water quality volume) and improve the functionality of stormwater management ponds throughout the City. This Request for Prequalification (RFPQ) is a formal request for submissions from interested Contractors. Contractors responding to this RFPQ must be able to demonstrate expertise and familiarity of projects completed of a similar size and complexity. Duncan McArthur Hall was built between 1969 and 1971 in two phases - A-wing and B-wing and it is home mainly to the Faculty of Education comprising mostly of administration offices, classrooms, lecture theatres, labs, technical shops, and a large education library. It also has a large auditorium which is heavily used throughout the year by Queen's and the Kingston community. Although McArthur Hall has had upgrades and renovations over the years, the main electrical service equipment (located in the A-wing and B-wing main electrical rooms) and the Motor Control Centre (MCC) are late 1960's-early 1970's-vintage and requires upgrade/replacement. Both A-wing and B-wing electrical rooms each contain (at least) one 4160 volt fused load break switch, a 1000kVA 4160-208/120V dry-type transformer and a 3000 amp 208/120V switchboard containing both drawout air circuit breakers and molded case circuit breakers. The A-wing electrical room also houses additional 4160-volt load break switches as Duncan McArthur Hall is loop fed (incoming/outgoing 4160V) and currently powers the West Campus Central Plant building at 4160V on a radial feed. Currently, McArthur Hall is fed directly from Utilities Kingston (UK) via UK 1201 but can be backfed from UK706 with Utilities Kingston's permission and aid. The B-wing electrical room is fed at 4160V from the A-wing electrical room. The intent of the project is to replace most of the original equipment in the main electrical rooms and two motor control centres. The Scope of Work pertains to the upgrade of the equipment in the main electrical rooms of A and B wings including, but not limited to replacement of 4160V switches, transformers and switchboards, feeders, a new 600A automatic transfer switch, and two 600A MCCs. Preferred Schedule: Start Date: March 2022 Preferred Completion Date: The project to be completed as quickly as possible and no later than August 21, 2022.

#### SUPPLY AND INSTALLATION OF LIFTING **BEAMS AND ACCESS PLATFORMS AT** THE WASTE WATER TREATMENT PLANT \$50,000 est

**CORNWALL, Stormont; Dundas and Glengarry, ON** 

2800 Montreal Rd, Cornwall, K6H 5R5 TENDERS DUE, 08-Mar-22 at 11:00 AM ET. Solicitation #: 22-T01, 181-16562-00

Owner: City of Cornwall - City Hall, 360 Pitt St, Cornwall ON K6J 3P9 613-930-2787 Fax: 613-932-

Struc Eng: WSP Canada Inc - Cornwall, P.J. Bruce, 1345 Rosemount Ave., Cornwall ON K6J 3E5 613-933-5602 Fax: 613-936-0335

The Wastewater Treatment Plant houses a multitude of heavy equipment such as pumps, motors and large valves that need to be serviced regularly. Many of these pieces of equipment are in areas such as basements and enclosed spaces limiting the options for safely rigging the equipment. In these circumstances lifting beams are an optimal solution to complete the work safely. In 2021 a structural engineering study was completed detailing locations for the required lifting beams. With this study, a drawing set of the lifting beams and structural specification was created. We now need to fabricate and install the lifting beams as detailed in the structural engineering package. #### RFP D/B - SUPPLY AND INSTALLATION OF **NEW ACCESSIBLE PLAYGROUNDS WITH NEW ENGINEERED WOOD CHIPS AT CHALMER'S PARK AND WELCOME PARK** \$90,000 est

PORT HOPE, Northumberland, ON Multiple Locations, Port Hope, L1A 3Z9

TENDERS DUE, 16-Mar-22 at 11:00 AM ET. Solicitation #: 08P-PRC-2022

Owner: Municipality of Port Hope, 56 Queen St., Port Hope ON L1A 3Z9 905-885-4544 Fax: 905-885-7698

This RFP is being issued, primarily as a means of securing a qualified contractor for the supply and installation of 2 New Accessible Playgrounds. These Playgrounds will be located at Chalmer's Park in Port Hope and Welcome Park in Welcome. The budget allotted for this project is \$90,000.00 net HST. Respondents are asked to supply up to three (3) detailed proposals for each park, illustrating how they would design and outfit the accessible playgrounds for optimal results in addition maximizing the play area. Each design shall be different and shall be creative, we encourage you to think freely. The design of the playgrounds must be different from each other and different in layout than other Municipal parks such as East Beach, Wladyka Park and Baulch Road. The Municipality is looking for creative design and layouts to enhance the experience of the kids using the parks. Question Deadline: Thu Mar 10, 2022 4:30:00 PM (EST) Documents are available at: https://porthope.bidsandtenders.ca/

Construction start 16-May-22; Completion by 30-Jun-22;

PROPOSAL DUE 16-Mar-22 at 11:00 AM ET. This report March 1, 2022.

SUPPLY AND INSTALLATION OF WATERFRONT

#### PATHWAY LIGHTS \$50,000 est MORRISBURG, Stormont; Dundas and Glengarry,

Canada Way, Morrisburg, KOC 1X0 TENDERS DUE, 17-Mar-22 at 4:00 PM ET. Solicitation #: ES22-11

Owner: Municipality of South Dundas, 34 Ottawa St., Morrisburg ON KOC 1XO 613-543-2673 Fax: 613-543-1076

Con Admin: Municipality of South Dundas, Austin Marcellus, 34 Ottawa St., Morrisburg ON KOC 1XO 613-543-2673 Fax: 613-543-1076

The Municipality is seeking a contractor/supplier to supply and install 11 lights along the Morrisburg Waterfront Pathway, located on Canada Way, Morrisburg, Ontario, KOC1XO. The existing pathway is currently under construction as part of the rehabilitation project initiated in 2021. The pathway is 1.5 km long and currently has 9 lights along the west portion of the pathway. This Tender outlines the work to supply and install 11 additional lights along the east portion of the pathway. The existing lights are Decorative Coach Lantern-Philips on 12 Ft Street Light Pole- Dyna Poles with an approx. 3'X5' cement base, and four 5/8" galvanized anchor bolts. The Municipality is seeking to continue this style of light throughout the east side of the pathways as well as the existing distance between each light. The land is owned and maintained by the Municipality of South Dundas. The successful contractor will be responsible for obtaining the appropriate locates prior to performing any excavation on Municipal property. Question Deadline: Thu Mar 10, 2022 12:00:00 PM (EST) Documents are available at: https://southdundas.bidsandtenders.ca/

Repro: Biddingo, 1210 Sheppard Ave, East, Suite 305, North York ON M2K 1E3

The City of Thorold invites applicants to review the attached RFPQ for Contractor prequalification for the rehabilitation and adaptive re-use upgrades to the Municipal Operations Centre. Details and Scope of work are included within the document. The City is seeking to retain a General construction Contractor for rehabilitation and adaptive re-use upgrades to the Municipal Operation Center located at 1543 Beaverdams Rd, Thorold, ON L2V 1N6 (the "Project") as outlined in Section 3 Scope of Work. The Project is critical to ensure the long-term operations of the City. Contractors have the opportunity to join the pre-Qualified list for the Project. Only Contractors that are prequalified through this Pre-Qualification process will be invited to submit a bid for the Project. It is anticipated that the subsequent Request for Proposal will be issued in March 2022 with construction starting in May 2022. The Request for Proposal will be issued through Biddingo. This RFPQ outlines the scope of required work, respondent responsibilities, prequalification requirements, selection criteria, and related terms and conditions. During the RFP phase a complete tender package will be issued to prequalified Contractors with the award criteria. To be added to the pre-Qualified list respondents must obtain a minimum evaluated overall score of 70% and a minimum evaluated score of 30% in each evaluated criterion; explained in Section 3.0 of this RFPQ.

#### **BECHTEL PARK DIAMOND REPLACEMENT** \$500,000 est WATERLOO, Waterloo, ON

185 Bridge St W, Waterloo, N2K 1K9

TENDERS DUE, 15-Mar-22 at 2:00 PM ET. Solicitation

Owner: City of Waterloo, 100 Regina St. S., Waterloo ON N2J 4A4 519-886-1550 Fax: 519-747-8500 Land Arch: RK & Associates, 8 Gaskin Crt., Barrie ON L4N 6K2 705-791-6489

This contract consists of the renovation of an existing baseball facility at Bechtel Park. The anticipated work involved in this contract includes but is not

limited to the removal and disposal of existing fencing, vegetation, and infield surfaces. The contract includes the supply and installation of new fencing and dugouts, accessible parking, concrete and asphalt paving, site grading, sodding, planting and irrigation works. Additional work may be added as budgets are available. The project will occur in conjunction with the demolition of 2 buildings on site as well as the renovation of 1 building on site. Demolition and renovation of current buildings will be done outside of this contract and all effort will be made to prevent the projects from overlapping. Bidders are asked to provide proof of ability in the form of examples of prior projects conducted by bidder that are similar to the Bechtel diamond renovation project. Once award, the project is set to begin May 2, 2022 and substantial completion to be Oct 31, 2022. Contractors are to be aware that no work is to be done on Sundays. This site is a high traffic site for park patrons. All effort must be taken to ensure site safety at all times for patrons of the park as other elements of the park will remain open during construction. 964-6379 Fax: 888-235-5800 McMaster University is seeking to retain the services of a qualified General Contractor for construction of the Peak Shavers Generators project. Qualified proponents are invited to submit responses in accordance with the terms of this Request for Proposal (hereafter referred to as RFP). McMaster intends to partake in several IESO market programs. This will be achieved through the installation of five (5) - 2MW natural gas generators (reciprocating engines). The generators will be primarily used for participation in the ICI program (peak shaving) with the option of utilizing it for other programs, such as Demand Response or Operating Reserves. Four (4) of the generators will be installed by the NF91 transformer yard and one (1) generator will be installed outside of ET Clarke Centre. Through the process of this RFP McMaster University is seeking to retain the services of a proponent to be assigned the purchase orders of the equipment and complete the supply and install of services required for the installation of the four (4) generators to be installed at the NF91 Transformer yard. McMaster University has procured the natural gas generators and switchgear for the project. Specification, shop drawings, and copies of the purchase orders for the equipment have been provided for reference. Through this RFP, the balance of the purchase orders for four (4) of the generators and switch gear will be assigned to the successful proponent. The purpose of the assignment of the purchase order is to maintain the constructor responsibility with the successful proponent and provide direct contact between the equipment vendor and the proponent. The assignment of the purchase order will be a direct flow through cost to the University with no Contractor mark-up and payment terms will be per the terms and conditions of the purchase order with the vendor and not subject to the terms and conditions set out in this RFP. The Scope of Services to be provided by the Proponent will include but is not limited to: - accepting the assignment of purchase orders of the equipment pre-ordered by McMaster University and complete the supply, install, and commissioning of the generators located at the NF91 yard. - Construction of new concrete foundations, slabs, trenches and fencing - Supply and installation of new E-House building - Civil & landscaping work included site grading and erosion control - Supply and installation of new wiring and accessories for power, lights, security and communications - Supply and installation of the new overhead service supports and connections to the existing 13.8 kVa system. - Supply and installation of new gas piping from the utility's gas station to the new generators and E-House - Commissioning/Verification of the new generators - The Project will comply with all governing legislation, codes,

laws, by-laws and requirements of authorities hav-

ing iurisdiction. Official bid documents must be obtained from www.merx.com

This RFP is issued by Colliers Project Leaders Inc. acting on behalf of the Owner. The Owner is seeking to retain a Construction Management team for site development of a new Lutherwood Community Mental Health Recreation HUB Document # 811701-0076 (1.0), this will include 9,000 sqft addition, demolition of the existing parklands building, office renovations and fit out of new commercial kitchen in the main building. The existing Parklands building will be demolished to make room for the new HUB, this building is 2 storeys plus a basement approx. 10,100sqft built in 1970. Phase 1 of the project will need to be completed prior to building demolition, this includes relocation of the commercial kitchen to the main building and 2-3 offices will be renovated. Phase 2 will be the addition of a new HUB, this will be 3 storeys (no basement) and approx. 9,000sqft with a connection to the existing facility. The main campus will still be operational during demolition and construction.

#### **How to use the Post-Bid Reports**

The Post-Bid Reports section of Daily Commercial News include Bid Results, Awards and projects Under Construction. Projects located throughout Ontario are reported.

#### **Bid Results**

The Daily Commercial News Bid Results section includes reports on projects announcing results after the receipt of tenders. Reports include the names and bid prices of low bidders, and the name of the successful contractor.

**Post-Bid Reports** 

The Daily Commercial News Starts section includes reports from building permits. Look for jobs you have been following or new jobs in your area of interest.

#### Regions included:

#### **Central Ontario**

Includes census divisions of Durham, York, Toronto, Peel, Halton, Dufferin, and Simcoe

Building Reports can also be found by using CCPI online at https://app.constructconnect.com/search. Need Help? Contact 1-800-959-0502.

www.dcnonl.com/certificates-and-notices search all Certificates of Substantial Performance, Certificates of Completion of Subcontract, Notices of Intention to Register a Condominium, Notices of Non-Payment of Holdback, and Notices of Termination.

NOTICE: Effective July 1, 2018, amendments to the Construction Act are reflected in the Certificates and Notices section of Daily Commercial News. These amendments required minor changes to the forms for Certificate of Substantial Performance (now called Form 9), Certificate of Completion of Subcontract (now called Form 10), and Notice of Intention to Register a Condominium (now called Form 11). The amendments also required publishing of two new notices: Notice of Non-Payment of Holdback using Form 6, and Notice of Termination using Form 8. To learn more about the amendments, visit www.dcnonl.com/ construction-act.

Visit www.dcnonl.com/submit-manual to download Forms 6, 8, 9, 10 and 11.

To publish certificates and notices, email dcncertificates@constructconnect.com or fax 1-800-947-7966. For more information call 905-752-5482.

Those placing notices are responsible for ensuring Daily Commercial News receives, by fax or otherwise, all necessary information and for reviewing Daily Commercial News upon publication for any errors or omissions and advising Daily Commercial News at once. Daily Commercial News will make good any errors or omissions attributable to it in the next available issue, but will otherwise bear no liability whatsoever for any failure to publish any notice, however caused and even if arising from Daily Commercial News' own negligence.
