London's West 5 to become Ontario's first net-zero mixed-use community

DON PROCTER

CORRESPONDENT

ix years in the making, the first net-zero mixed-use community in Ontario is taking shape in London.

A 70-acre development called West 5, it sets energy precedents that can help open doors for other green-conscious developments.

"The entire community will consume about 10 megawatts of energy which will be produced in the community" through solar means, Neil Carter, director of commercial construction, Sifton Properties Limited, one of West

5's developers, told an audience recently at a Canada Green Building Council webinar on the project.

That solar power will be generated from panels on the roofs of all of its buildings, including a parking garage, and from solar arrays incorporated into many of the building's

When built out in 10 to 15 years, the neighbourhood will have 2,000 residential units and up to 400,000 square feet of commercial/retail space, Carter said.

Initially, Sifton's objective was to create "a smart, healthy and walkable community" but its agenda

expanded to include net-zero when Sifton partnered with s2e Technologies, which focuses on sustainable community development.

Derek Satnik, an engineer with s2e, said the business case for net-zero communities makes more sense as technological improvements rise.

"If you can find these things, if you can structure the project right, it really does pay for itself. Honestly, it is getting more and more compelling."

Carter said the construction costs to meet net-zero have dropped "significantly" largely

West Work

because of a growing use of high efficiency materials, technologies and the efforts by more builders to employ energy efficiency practices.

As an example, more homes today are constructed with additional exterior insulation and triple glazed windows because it is not expensive, Carter said.

Continued technological advancements also support the coming net-zero shift, he said, noting 275 watts was the solar roof panel standard five years ago but now panels are closer to 500

In Brief

ArcelorMittal workers in Quebec to get 26% raise

LONGUEUIL, QUE.

Steelmaker ArcelorMittal Long Products Canada has announced it has signed three collective agreements with its employees from the Contrecoeur-East and Longueuil complexes in Quebec and from administrative offices.

Worker ratification came in a vote on Feb. 27.

The vote puts an end to a worker strike that began on Feb. 2 and enables a return to normal operations at the Contrecoeur East and Longueuil complexes and in the offices as of Feb. 28.

The 800 workers are represented by the United Steelworkers.

The new six-year collective agreements covering 2022-2028 offer a wage increase of \$9 per hour, which represents a 26-per-cent increase in average wages.

This means that by the end of the agreement, the wage at the bottom of the scale will increase from \$29.93 to \$38.93 per hour. The wage at the top of the scale will rise to \$49.92 per hour.

Premium increases could eventually lead to an increase of up to \$2 per hour.

The workers' defined benefit pension plan has increased by \$9, including \$4 in the first year, from \$59 per month per year of service to \$68 per month per year of service at the end of the six years.

"We are very proud of the innovations introduced in these collective labour agreements, and we count on each of our employees to continue the development of our company," stated company CEO Francois Perras in a statement.

"This new contract is a step forward for the industry. It will allow us to attract the new generation and retain all our people, to whom we are particularly grateful despite the conflict."

Floors are moving up at the West condos on Niagara Street in Toronto. The project by owner/general contractor Aspen Ridge Homes Ltd. consists of the redevelopment of the existing heritage coffin factory lands to make way for one 12-storey and one 14-storey tower with a total of 320 residential units linked atop a six-storey podium built behind the retained and converted factory building which would primarily house commercial/retail spaces. The towers will have indoor and outdoor amenity spaces including a cafe, party room, gym, a family zone and a terrace. The project was designed by Core Architects Inc and consultants are Jablonsky, Ast & Partners (structural), Able Engineering Inc. (mechanical/electrical), Mike Niven Interior Design and The MBTW Group (landscape). Subtrades include Roni Excavating.

Economy at a Glance

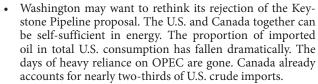

Prepared by Alex Carrick, ConstructConnect® Chief Economist

Economic and Other Consequences of Putin's Unilateral War on Ukraine

Consider this article an addendum to my usual monthly Nuggets report. Here are some of the economic and other consequences of Russia's unilateral war on

- The reliance of much of Europe (especially Germany) on Russian natural gas will irrevocably be acknowledged as a huge mistake. Gas in many parts of the world is priced at a factor five or six times greater than it is in North America. With Nord Stream 2 not advancing, that multiple is about to go much higher. This opens immense opportunities for the establishment of LNG exporting facilities along the U.S. and Canadian coastlines.
- The energy price differential will also promote more fertilizer and petrochemical production, with a view to world markets, in America and Canada.
- China may become emboldened in its ambitions concerning Taiwan, resulting in scary ripple effects. (Also, of course, the potential for the Ukraine conflict to spin out of control and extend beyond its current confines is alarming.)
- World travel, which has been experiencing a mild revival, may withdraw back into its shell. Hot war zones put a damper on tourism enthusiasm.

Alex Carrick

- Governments in multiple countries will likely divert some of their spending away from other objectives, such as in the social sphere, in favor of beefing up their defense and other military capabilities. Some needed infrastructure works may also become a casualty of this re-ordering of goals.
- Commodities (gold, silver, base metals, fossil fuels) are always a hedge in times of uncertainty and recent rounds of price spikes will likely be extended and exaggerated. The incentive for more extraction of raw materials has received a boost. Stock market investors are taking a dimmer view.

After two years of intense anxiety tied to the coronavirus, who needs this? One man, apparently, Vladimir Putin. Even his coterie of 'yes men', if they're being honest, can't believe this Ukraine invasion is a good idea.

What we're seeing is an example of one of the extreme dangers when a citizenry comes under autocratic rule. Such a leader can go down a dark path and take all his or her countrymen, willingly or not, with them. A whole nation then becomes designated an international pariah.

Ukraine has a population roughly equivalent to California and Canada. Its land mass covers an area approximately the same size as Texas or Alberta.

With occupation, will come overlords and intense patriotic resistance that will drag on forever.

Taking over Ukraine, which in 1991 voted 92% to separate from the Soviet Union, will be an enormous pungent bite to swallow.

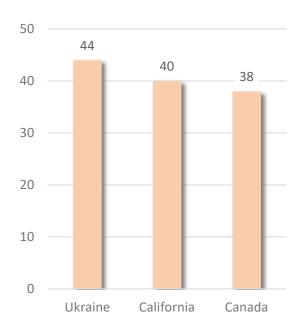

It's easy from a North American vantage point to take comfort in our geographic distance from the conflict.

But I have no doubt that many of us have awakened this morning with a great deal of sympathy for the people immersed, through no fault of their own, in a nightmare scenario on the other side of the world.

Board game a North American first

The JOBSITE board game is a new way for youth and families to learn about the ICI and homebuilding construction industry together while having fun.

Continued from Pg. 1

"It comes with miniature heavy equipment pieces and those are what you use as your player pawns."

Smith came up with the idea around the holiday season.

"I thought, how do I, as a father who has been in and around the construction industry all my life, how do I connect with my kids? How can I tell them what dad does and connect with them on a level that we can have some fun? We can learn a little bit and we can play, we can compete," he said.

"Out of the blue, I don't know how it happened, and I can't tell you exactly when it happened, I woke up in the middle of the night and I said 'a board game!' That was the beginning of JOB-

Within the first week of January he had designed the board for the ICI version, designed and sourced the box and the board from a manufacturer in Hong Kong.

"I developed all of the game pieces and all of the challenge cards and came up with the way the thing functions," said Smith.

"It's been tested. We've done a few modifications to it and we're ready to go with the first orders."

The game is designed for

ages 12 and up and the ICI version includes categories Construction 101 with multiple choice questions; joint venture;

acronyms; liquidated damages;

invest and profit; tools and toys;

low bid wins; supply chain problems; and cash advance. In the homebuilding version, categories include Homebuilding 101; estimate; acronyms; attainable housing; build to suit; tools and toys; cash advance;

land taxes; and net-zero. "This game will introduce even somebody 12 or 13 years old into all sorts of different things and allow them to critically think their way through some challenges," said Smith.

Industry associations, organizations and unions across Canada have been invited to order during a special pre-public launch period that runs until April 30.

Ideally Smith would like to see the game played at homes, in schools and association offices and events.

"I'd love to see association executives have a copy in their offices to play with their members. Maybe a game night to connect members again, that's really what it's about," said Smith.

"We can do competitions at the construction association, we

can do all sorts of things," said Smith.

"It's up to the associations how they want to use the game...I'll leave it up to them to figure it out."

This is a different way of getting the message about the viability of a career in the trades

"What have we been doing up to this point, we've been doing speeches, we've been handing out pamphlets and things like that when we want to connect with the high school kids," he explained.

"We keep hearing about needing to find strategies to engage and inform youth and transitioning adults, for the future of trades, professionals and the industry overall. This is a fun, and at the same time, an educational way for families, institutions and organizations to do just that."

The board game, which is the first of its kind in North America to focus on the industry, will be assembled and shipped from London, Ont.

About 60 games a day or 300 a week can be produced.

A third design professionals version will be in production by

"Organizations ordering 50 or more units can imprint their logos and any customized artwork branding desired on the board and box," Smith explained.

Their association, organization, or union can be built into the game through customized landing squares and challenge cards informing and educating players about their organization and its purpose."

For more information about the game visit www.jobsitegame. com.

West 5 features air handling **HVAC** by Mitsubishi Systems

Continued from Pg. 1

"It is going to help builders meet net-zero energy goals because they no longer have to have those huge roof areas to accommodate solar roof pan-

Other energy features at West 5 include efficient air handling HVAC systems by Mitsubishi Systems, LED lighting, smart controls, building siting for solar gain and low windowto-wall ratios.

They are inexpensive ways to bring a building to net-zero," Carter pointed out.

He added a 20 per cent premium on energy efficiency six or seven years ago when construction started on West 5 has dropped to about 12 to 13 per cent today. That is still a premium but tenants are willing to pay more for rent because those costs are offset by lower utility bills.

There are energy trade-offs in the project, however.

While the lowrise townhouse component readily meets net-zero targets, buildings such as the 10-storey 115-unit residence on the site are net positive. The difference is overcome through community net metering

where energy is "shared between them" to achieve net-zero goals across the development.

Carter told the audience the community's shared metering was approved for the first time under a new provincial regulation that includes the names of Sifton and other key players on the development team.

Satnik said the provincial precedent is important because Ontario's aging energy grid will need retrofitting and "it would be amazingly positive if we could have lots of private players helping to rebuild it. That is what Neal (Sifton) is doing here."

Panellist Clive Carr, residential sales manager, HVAC with Mitsubishi Electric Sales Canada Inc., said he's overcome developer skepticism about new energy efficient technology by citing previous successes in the field.

In 2016 Mitsubishi worked with Natural Resources Canada to demonstrate the feasibility of cold climate air source heat pumps for residential developments.

"We see a growing trend of its acceptance...and other manufacturers are coming on board with their own cold air heat pumps."

The first net-zero mixed-use community in Ontario is taking shape in London. A 70-acre development called West 5 will feature 2,000 residential units and up to 400,000 square feet of commercial/retail space when built out in 10 to 15 years.

Pricing COVID risks into contracts a major challenge: CI panel

DON WALL

STAFF WRITER

he newest COVID-related challenge buffeting Canada's construction sector is not keeping workers safe or creating vaccine policies but rather it's properly pricing risks in a world of inflated costs and unpredictable supply chains.

The Canadian Institute (CI) assembled three legal and claims experts Feb. 24 for a panel titled Managing Your Projects, COVID-Related Risks and Delays.

Andre Brace, senior director of construction solutions for FTI Consulting, Sahil Shoor, partner with Gowling WLG, and Robert Poole, senior managing director with FTI, highlighted best practices in an online session moderated by conference co-host Howard Krupat, partner with DLA Piper.

"To me, the biggest challenge now related to COVID in particular is really relating to claims, contracts and pricing of work. I think those are real challenges that organizations on both the owner and the contractor side are going to face," Poole stated, noting numerous complex COVID disputes in the sector as owners and contractors wade through delay and productivity issues.

"Disentangling all of that is going to be a major challenge. So my view is, the challenges going forward are more related to the practical side, the claims side, and less on the actual impacts of COVID."

As claims pile up, the panellists said, it is more essential than ever to ensure high-quality record-keeping. Concerted efforts must be made to ensure there are corporate resources available to undertake those record-keeping and disentanglement efforts.

The resources needed to prepare the claims "don't come out of thin air," Poole said. "It needs a lot of work to prepare and analyze claims or to consider them whether or not they are actually substantiating the claims that are made...and at the same time you've got your regular business you're supposed to

The hiring of claims experts need not increase the adversarial nature of dealing with a COVID-related dispute, Poole said.

Their forensic approach is effective in demonstrating true COVID-related causes and effects, and attempts to reconcile losses. Methods used include delay analysis and loss-of-productivity analysis including industry studies and project benchmarking.

"My suggestion is, very often it's in the interests of clients on both the owner and the contractor side to really appoint legal and claims experts who know how these claims should be prepared and substantiated," said

"Then the second thing is, I've got a really strong opinion about working collaborative-

Krupat noted there has been a willingness to collaborate on disputes.

"Especially about a year into the pandemic, there was a strong willingness on the part of both owners and contractors to negotiate their way through these claims rather than to resort to a formal dispute-resolution process," he said. "I've seen some very positive results through mediations."

The better the records, Brace said, the better the analysis that can be done.

"One of the things that I have found, particularly having spent a lot of my career working in projects, is that we know where to look in many cases, especially with COVID claims that can be very complex, and we'll have to push the boundaries of typically where we find the information."

Onsite personnel issues adding to costs are well understood by now and include absenteeism, refusal to work and mental health impacts, Brace said.

"Even if they're working at 100-per-cent productivity or the planned productivity levels, if you've got half the people, you're not going to achieve the schedule and the overall project completion that you're expecting,"

"At the start of the shift, before even starting to do productive work, we're doing these new activities that are separate and distinct from the actual time loss or productivity loss that's happening."

Supply chain issues can have many causes and now there are political protests at borders, Poole noted.

"There's tons of potential for things to go wrong. It's quite amazing that more things do not go wrong," he said. "We've seen these closing borders, restrictions on movements of goods or whether it's just supply chain, or manufacturing plants having a problem with

It all adds up to a greater onus on estimators and drafters of contracts to strive for improved contracts that more carefully incorporate all possible risks, Shoor said.

"What you should be doing, the first step in my respectful view, is you should be looking at the contract in question as to what steps you can and cannot take to mitigate the risk and damage in advance of that event actually taking place," he said, noting that "foreseeability" is an increasingly important

"Be proactive in terms of how better you can have the ability to meet the contract obligations, thinking about it routinely and planning it accordingly."

This Request for Proposals (the RFP) is an invitation by the Town of Bradford West Gwillimbury (the Town) to prospective proponents to submit proposals for the Renovation of 177 Church St., as further described in Section A of the RFP Particulars (Appendix D) (the Deliverables). In late 2020, the Town acquired the former Bradford Elementary School property. A 28,600 sq. ft. single-storey building situated on approximately three acres. The original building dates back to the 1950s with several additions. Town Council has approved the creation of a Community Hub with a vision to include social support services, skills development centre, not-for-profit offices, commercial kitchen, flex-use community

space, meeting rooms, and other amenities. The Town seeks a qualified contractor to undertake the renovations and additions described in the tender specifications and associated drawings. Documents can be obtained at: https://townofbwg.bidsandtenders.ca Question Deadline: Feb 18, 2022 4:00:00 PM (EST)

PROPOSAL - ALEXANDRA PARK PHASE 2A - PLUMBING, HEATING AND FIRE PROTECTION \$10.000.000 est TORONTO, Toronto, ON

593 Dundas St W, Toronto, M5T 1H6

TENDERS DUE, 16-Mar-22 at 4:00 PM ET. Solicitation

Owner: Toronto Community Housing Corporation -Procurement, 35 Carl Hall Rd, North York ON M3K 2B6 416-981-5500

CM: Deltera Inc, David Dawe, 4800 Dufferin St, North York ON M3H 5S9 416-736-8353 Fax: 416-661-

CM: Deltera Inc, Allicia Drew, 4800 Dufferin St, North York ON M3H 5S9 647-985-6384 Fax: 416-661-

The Alexandra Park community is bounded by Dundas Street West, Queen Street West, Cameron Street and Augusta / Denison Avenues. When completed, the revitalization of the Alexandra Park community will see approximately 2,168 new and 396 refurbished residential units on approximately 7.3 hectares. The revitalization will introduce a mix of uses, tenures and incomes to create a more socially and economically robust neighbourhood that is fully integrated into the City's urban fabric. From 2013-2019 TCHC worked with their development partner, Tridel, to complete Phase 1 of the revitalization. In 2020, TCHC has again partnered with Tridel for Phase 2 of the revitalization which concerns the remainder of the lands at Alexandra Park. Phase 2A, the next sub-phase of development, is currently underway. Alex Park Phase 2A (Site 1 and Site 2) complex in its entirety is a twin tower, multiple occupancy, mixed-used development consisting of shared, below grade parking levels, podiums with retail and commercial daycare uses and 2 mid-rise residential towers. The extent of this Contract is bounded by the entire boundaries of both Site 1 and Site 2 where Site 1 is known as the MRKT Condo and Site 2 is known as Atkinson Apartment. Dundas Alexandra Park Residences Inc. is the owner of land known as Site 1 and TCHC is the owner of land known as Site 2. Deltera will be the Construction Manager for Alex Park Phase 2A project (Site 1 and Site 2) and is seeking a Contractor for the provision of Plumbing, Heating & amp; Fire Protection services at Alexandra Park Phase 2A. The project will be awarded to the successful proponent with the highest, final and ranking Proposal and the project agreement will be entered with Dundas Alexandra Park Residences Inc. This work is categorized as Plumbing, Heating & Dry, Fire Protection work. Documents can be obtained at: https://www.torontohousing.ca/doing-business/ procurement-opportunities

TENDERS DUE, 25-Mar-22 at 2:00 PM ET. Solicitation #: 2022-02

Owner: Township of Clearview, 217 Gideon St, Stayner ON LOM 1S0 705-428-6230 Fax: 705-428-0288 Con Admin: Township of Clearview, Dan Perreault, 217

Gideon St, Stayner ON LOM 1SO 705-428-6230 x230 Fax: 705-428-0288

The Township of Clearview desires to retain the services of a design consultant and contractor team to provide a new combined firehall and public works building on the property of 5212 County Road 9

in New Lowell, Clearview, Ontario. This Request for Proposal is issued by the Township of Clearview (Township). The Township desires to retain the services of a design consultant and contractor team (Proponent) to provide a new combined firehall and public works building on their property at 5212 County Road 9, New Lowell, Ontario, to be known as the New Lowell Joint Operations Centre. This project also includes demolition and removal of existing structures on site. The project is to be delivered in the design build procurement method, with construction happening in 2022. Please refer to the detailed scope of work and available drawings and reports contained within the appendices for more information. The purpose of the Design-Build Proposal process is to enable the Township to select a qualified Design-Builder responding to the Request for Proposal (RFP) requirements and achieving the highest overall score in the evaluation for the Design-Build implementation of the abovecaptioned project. Geo Eng: Cambium Inc., Zhaochang Luo, 194 Sophia St, Peterborough ON K9H 1E5 705-741-4109 Fax:

The City of Oshawa is looking to procure construction services for the redevelopment of two (2) parks: Cordova Valley Park, located at 811 Glen Street, Oshawa; and, Fenelon / Venus Park, located at 1230 Venus Crescent, Oshawa. The City reserves the right to award in whole (both Cordova Valley Park and Fenelon/Venus Park), or in part (Cordova Valley Park only). Fenelon / Venus Park may or may not be awarded, or may be awarded within 90 days of bid close. Scope of services within this project include mobilization, site layout and grading, excavation works, asphalt paving, cast-in-place concrete, playground and splashpad installation, site furnishings, utility connections including electrical servicing and water connection, sodding, seeding, and planting works. All work shall be in accordance with the terms, conditions, drawings, specifications, appendices, and attachments of this Request for Tender (R.F.T.). Bidders are to bid on each park in whole. Tender award will be based on the Schedule of Prices. The Provisional Schedule of Prices is optional work the City may or may not award. The tender will be awarded to the lowest compliant combined bid for both parks. The project sites are located at 811 Glen Street, Oshawa, and 1230 Venus Crescent, Oshawa. Work must be continuous from the project start date until project completion. The successful Contractor will be required to submit a detailed project schedule upon award of this Contract as well as interim schedules as required by the project manager and/or Contract administrator. Cordova Valley Park must be substantially complete by December 31, 2022. Fenelon / Venus Park is to be substantially complete by December 31, 2022 if awarded with Cordova Valley Park. Fenelon / Venus Park is to be substantially complete by June 15, 2023 if awarded subsequent to Cordova Valley

RFQ CONTRACTOR - SEDIMENT REMOVAL AT STORMWATER MANAGEMENT PONDS \$1,000,000 est MARKHAM, York, ON

Multiple Locations, Markham, L3R 9W3

TENDERS DUE, 03-Mar-22 at 3:00 PM ET. Solicitation #: 028-P-22

Owner: City of Markham, 101 Town Centre Blvd., Markham ON L3R 9W3 905-477-7000 Fax: 905-Con Admin: City of Markham, Flora Chan, 101 Town

Centre Blvd., Markham ON L3R 9W3 905-477-7000 x3189 Fax: 905-479-7767

Civ Eng: AECOM Canada Ltd - Markham, Natalie Ioannides, 105 Commerce Valley Dr West, Thornhill ON L3T 7W3 905-747-7760 Fax: 905-886-9494

The City has identified a number of Stormwater Management (SWM) ponds requiring sediment removal, retrofit and/ or rehabilitation. SWM ponds have been constructed in the City of Markham as effective means of providing water quality improvements and flood mitigation in a watershed. With time, the accumulation of sediments in a SWM pond results in reduction of the pond capacity and consequently, reduction in pond efficiency. The sediment removal, retrofit and rehabilitation works for stormwater management ponds is consistent with the City's strategy to restore the treatment capacity (i.e. water quality volume) and improve the functionality of stormwater management ponds throughout the City. This Request for Prequalification (RFPQ) is a formal request for submissions from interested Contractors. Contractors responding to this RFPQ must be able to demonstrate expertise and familiarity of projects completed of a similar size and complexity. Question Deadline: Thu Feb 24, 2022 4:00 PM (EST) Documents are available at: https:// markham.bidsandtenders.ca/

The Wastewater Treatment Plant houses a multitude of heavy equipment such as pumps, motors and large valves that need to be serviced regularly. Many of these pieces of equipment are in areas such as basements and enclosed spaces limiting the options for safely rigging the equipment. In these circumstances lifting beams are an optimal solution to complete the work safely. In 2021 a structural engineering study was completed detailing locations for the required lifting beams. With this study, a drawing set of the lifting beams and structural specification was created. We now need to fabricate and install the lifting beams as detailed in the structural engineering package. RFP D/B - SUPPLY AND INSTALLATION OF **NEW ACCESSIBLE PLAYGROUNDS WITH NEW ENGINEERED WOOD CHIPS AT CHALMER'S PARK AND WELCOME PARK** \$90,000 est

PORT HOPE, Northumberland, ON Multiple Locations, Port Hope, L1A 3Z9

TENDERS DUE, 16-Mar-22 at 11:00 AM ET. Solicitation #: 08P-PRC-2022

Owner: Municipality of Port Hope, 56 Queen St., Port Hope ON L1A 3Z9 905-885-4544 Fax: 905-885-

This RFP is being issued, primarily as a means of securing a qualified contractor for the supply and installation of 2 New Accessible Playgrounds. These Playgrounds will be located at Chalmer's Park in Port Hope and Welcome Park in Welcome. The budget allotted for this project is \$90,000.00 net HST. Respondents are asked to supply up to three (3) detailed proposals for each park, illustrating how they would design and outfit the accessible playgrounds for optimal results in addition maximizing the play area. Each design shall be different and shall be creative, we encourage you to think freely. The design of the playgrounds must be different from each other and different in layout than other Municipal parks such as East Beach, Wladyka Park and Baulch Road. The Municipality is looking for creative design and layouts to enhance the experience of the kids using the parks. Question Deadline: Thu Mar 10, 2022 4:30:00 PM (EST) Documents are available at: https://porthope.bidsandtenders.ca/

SUPPLY AND INSTALLATION OF PIPE SUB-**DRAINS** \$200,000 est **MIDDLESEX CENTRE, Middlesex, ON**

Multiple Locations, Middlesex Centre, NOL 1E0 TENDERS DUE, 09-Mar-22 at 12:00 PM ET. Solicita-

tion #: M-E-22 Owner: County of Middlesex, 399 Ridout St N, London

ON N6A 2P1 519-434-7321 Fax: 519-434-0638

Scope of Work: The work includes supplying all labour, equipment and materials to install heavy wall plastic tile shoulder drains on both sides of the roads at locations designated by the County. Outlet pipes will be installed by the County. Specifications for Supply and Installation of Pipe Sub-drains: The sub-drain shall be 100 mm (4") diameter perforated plastic tubing of a minimum weight of 175 grams/ft. - The tile shall be installed by plowing to a minimum depth of 500 mm at a location 1.0 m. from proposed edge of pavement or as set by the County. Minimum grades shall be 0.25% and grades shall be set using a laser where pavement grades are flat. - These roads will be resurfaced after the drains are installed. However, effort must be made by the contractor to avoid damaging existing pavement. Any excessive damage caused by the contractor during sub drain installation shall be re-instated prior to final paving. - Low points in the grade are to be marked by the Contractor. - The County will be responsible for restoring the gravel shoulder - It is agreed by the Contractor that in case the work is not completed by the completion dates specified, the balance of the remaining work is cancelled and there will be no payment made to the contractor for any work not completed including the supply or restocking of materials. The work under this Contract generally consists of the Reconstruction of Argyle Street and McKenzie Street from Cambria Street to St. David Street. The Reconstruction activities primarily relate to the improving of roadway drainage, replacement of the existing sanitary sewer, watermain and storm sewer. New sidewalks and curb shall be installed where indicated on the plans. This project will also include the coordination with CN Rail during work in the McKenzie Street and Cambria Street intersection. The Contractor will not be allowed to close

any street without the express written consent of the City. Work it to be completed in two stages to reduce impact to citizens. Question Deadline: Thu Mar 17, 2022 2:00:00 PM (EDT) Documents are available at: https://stratford.bidsandtenders.ca/ Construction start 02-May-22; Completion by 19-Sep-

Proponents must submit an executed Non-Disclosure Agreement in order to be provided with access to the Request for Proposal documents. The executed NDA must be submitted by e-mail in PDF format to Prabhdeep Singh (Prabhdeep.Virdi@infrastructureontario. ca). Please ensure the NDA is authorized by an individual with the authority to bind the Respondent. Request for Proposals for Weeneebayko Area Health Authority Redevelopment Project. Infrastructure Ontario (IO) and Weeneebayko Area Health Authority (WAHA) have issued this Request for Proposals (RFP) for a team to deliver the WAHA Redevelopment Project. The WAHA Redevelopment project involves the construction of a new hospital, Elder Care Lodge, visitor hostel and staff accommodations in Moosonee and a new Ambulatory Care Centre on Moose Factory Island. These modern facilities will support WAHA in providing exceptional, culturally sensitive healthcare to patients and clients living along Ontario's James Bay and Hudson Bay coasts, many of whom are Indigenous. The new health campus in Moosonee will include: - 36 inpatient beds, in private rooms; - A larger 24-hour Emergency Department; - Modern surgical suites; - Dialysis; - Expanded mental health and addictions programming; - Improved primary health care services; - Lab/Pharmacy/Diagnostic Imaging; - Traditional Healing; - A new 32-bed Elder Care Lodge; - A hostel for patients and visitors; and - Residences for staff. The new ambulatory care centre on Moose Factory Island will include: - Emergency health services; - Access to primary health care; - Diagnostic imaging capabilities;

Physiotherapy; - Dental; - Dialysis; - Ontario

Telemedicine Network; - Traditional Healing and Spirituality; and - Health promotion programming The successful bidder at the conclusion of the RFP process would work in collaboration with IO and WAHA, under a Development Phase Agreement, to further define and refine project requirements and design, pricing, and risk parameters. Additional Bidding Instructions: Proponents shall submit their Preliminary Technical Assessment Submission to the Sponsors using the Electronic Submission and Evaluation System (AWARD) through the Phase 1 Submission Portal. Proponents are reminded that pre-registration for the Electronic Submission and Evaluation System (AWARD) is required. Please see the User Guide uploaded as part of the Background Information Documents on MERX. Proponents are requested to register in AWARD under their Proponent name for the purpose of submitting a Preliminary Technical Assessment Submission via the Phase 1 Submission Portal Official bid documents must be obtained from www.merx.com Last day to Submit RFI 21-Feb-2022

Repro: Biddingo, 1210 Sheppard Ave, East, Suite 305, North York ON M2K 1E3

This tender is to upgrade the existing intersection of Wellington Street and First Avenue to a roundabout to increase safety and improve traffic flow. The Consultant Terms of Reference (TOR) defines the scope of work required from the Consultant for professional engineering services for the preparation of detailed designs, specifications, tendering and contract administration for the provision of a redesigned intersection configuration, new storm water management infrastructure and road reconstruction on Wellington Street, between Second and First Avenues as well the extent of First Avenue from the boundary of MTO right-of-way (Highway 72) to Wellington Street. The project includes: * Redesigned intersection resulting from a Traffic Impact Study (TIS) to facilitate safe vehicular traffic movement through the intersection; * Installation of approximately 200 metres of new storm water sewer main and storm water catchment appurtenances; * Complete road re-construction, including curb & Dy gutter and sidewalks; * Pedestrian cross-over to facilitate safe pedestrian movements across Wellington Street to access the recreational trail system to the south.

How to use the Post-Bid Reports

The Post-Bid Reports section of Daily Commercial News include Bid Results, Awards and projects Under Construction. Projects located throughout Ontario are reported.

Bid Results

The Daily Commercial News Bid Results section includes reports on projects announcing results after the receipt of tenders. Reports include the names and bid prices of low bidders, and the name of the successful contractor.

The Daily Commercial News Starts section includes reports from building permits. Look for jobs you have been following or new jobs in your area of interest.

Regions included:

Central Ontario

Includes census divisions of Durham, York, Toronto, Peel, Halton, Dufferin, and Simcoe

Building Reports can also be found by using CCPI online at https://app.constructconnect.com/search. Need Help? Contact 1-800-959-0502.

www.dcnonl.com/certificates-and-notices search all Certificates of Substantial Performance, Certificates of Completion of Subcontract, Notices of Intention to Register a Condominium, Notices of Non-Payment of Holdback, and Notices of Termination.

NOTICE: Effective July 1, 2018, amendments to the Construction Act are reflected in the Certificates and Notices section of Daily Commercial News. These amendments required minor changes to the forms for Certificate of Substantial Performance (now called Form 9), Certificate of Completion of Subcontract (now called Form 10), and Notice of Intention to Register a Condominium (now called Form 11). The amendments also required publishing of two new notices: Notice of Non-Payment of Holdback using Form 6, and Notice of Termination using Form 8. To learn more about the amendments, visit www.dcnonl.com/ construction-act.

Visit www.dcnonl.com/submit-manual to download Forms 6, 8, 9, 10 and 11.
