In Brief

Naloxone kits on sites is 'about saving lives'

ANGELA GISMONDI STAFF WRITER

The Ontario government's proposed legislation to require all construction sites in Ontario to have naloxone kits onsite is a big step in the right direction, says the Ontario Construction Consortium (OCC).

The measure is one of the key recommendations identified in The Other Pandemic Campaign,

launched by the OCC last year to raise awareness on the opioid overdose crisis in the construction industry.

"We are pleased that the government is taking action on this situation," said Phil Gillies, executive director of the OCC. "We are delighted that the Ontario government is implementing one of the key recommendations of our The Other Pandemic Campaign.

It's all about improving the lives of construction workers wrestling with addiction and it's all about saving lives."

Minister of Labour, Training and Skills Development Monte McNaughton and Associate Minister for Mental Health and Addictions Michael Tibollo were at the T3 Bayside construction site in Toronto March 1 to make the announcement.

Naloxone is a fast-acting drug used to temporarily reverse the effects of opioid overdoses. It can prevent death if administered

According to a study 2,500 Ontarians died of drug overdose in 2020 and of those who were employed at the time of their death, 30 per cent were construction workers, Gillies explained.

8 Women's Day workshop

Skills Ontario hosts March

March 8 is International Women's Day and Skills Ontario is celebrating with two free events: the International Women's Day Conference and the International Women's Day Workshop.

The theme of the 2022 International Women's Day campaign is #BreakTheBias.

The conference will have two sessions, one at 10 a.m. (EST) and at 7 p.m. (EST), so those attending can take part in the conference at the time that is most convenient. It is geared towards students in Grades 11 and 12 and at the post-secondary level, apprentices, businesswomen, tradeswomen and advocates for women in the skilled trades and technologies.

The workshop, intended for students in Grades 6, 7 and 8, will run from 10 to 11 a.m. (EST). Topics include allyship, facing discrimination, health and safety, incentives, resources and more. Attendees will hear from many panellists and speakers to learn more about pursuing skilled trades and technologies.

Over the course of the year, Skills Ontario and its partners will host Young Women's Career Exploration events at locations across Ontario that bring education, hands-on experience and mentorship together, ultimately making the connection to successful career opportunities in the skilled trades and technology sectors, indicates a release.

The event series culminates in the Young Women's Conferences at the Skills Ontario Competition that will be held virtually on May 3.

"Opportunities for women in trades and tech are limitless," said Lindsay Chester, program manager of Skills Ontario's Young Women's Initiatives, in a statement. "We need to continue to raise awareness of the career options and provide platforms for female tradespeople to tell their story."

Brique-Recyc gives old bricks new life with innovative quick cleaning machine

DON PROCTER

CORRESPONDENT

machine that can save masonry restoration contractors time and money by quickly cleaning old mortar off used bricks for reuse is slated to hit the market this year in Quebec.

"With this machine we are able to clean a brick in two to four seconds...ready to install," says Doina Chifa, co-ordinator of Brique-Recyc.

Traditional cleaning methods, by comparison, take longer, are costly and can damage bricks, she points out.

Three years in the making, the patented machine cleans 99 per cent of a brick through a process involving a concrete grinder that allows the cleaning of the brick extremities.

The Brique-Recyc quick brick cleaning machine is the brainchild of Montreal-based contractor Maconnerie Gratton president Tommy Bouillon (right) and his business partners David Dufour (left) and Hugo Cartier (not pictured).

Brique-Recyc is the brainchild of Montreal-based contractor Maçonnerie Gratton president Tommy Bouillon and his business partners David Dufour and Hugo Cartier. The brick masonry restoration contractor works primarily in the multi-family and institutional sectors in Montreal.

Three years in the making, the patented machine cleans 99 per cent of a brick through a process involving "a concrete grinder that

allows the cleaning of the brick extremities," says Chifa.

The bricks are "precisely aligned" by lasers a conveyor belt which moves the brick between two diamond saw blades for mortar

The brick cleaner has caught the attention of Synergy Montreal (SM), an initiative driven by PME MTL East Island.

CISC presents Hugh Krentz and Robert Third with lifetime achievement awards

The Canadian Institute of Steel Construction (CISC) recently presented the 2020 CISC Alfred F. Wong Lifetime Achievement Awards.

This year's honourees were recognized for a lifetime of dedication to the advancement of steel construction in Canada and their commitment to expanding the knowledge of the steel industry for the benefit of society, the steel construction industry and associated professions.

With 50 years of experience as an engineer in the steel and construction industries, Hugh Krentz has been instrumental in making Canadian buildings and bridges safer and developed more efficient, safe and sound building codes and standards which are now in use in Canada and around the world.

Krentz graduated from the University of Manitoba in 1957 and joined the CISC in 1960. He became chief engineer in 1964 and director of research and development of the Canadian Steel Construction Council in 1969. He was appointed secretary of the CISC in 1970 and secretary of the council a year later.

In 1978 he was appointed as president of the CISC and retired in 2001 after 40 years of service. He continued to serve the industry in the capacity of consultant to CISC and executive director of the Steel Structures Education Foundation (SSEF), now the CISC Education and Research

MARKHAM, ONT. Council, until 2007.

In 2005, the CISC H.A. Krentz Research Award was created in appreciation of his contributions to the engineering profession, the development of codes and standards, the education of engineers and to the development of the Canadian steel industry, states a release.

In 2015, the Hugh A. Krentz Exemplary Student Award was established by the CWB Welding Foundation to support Canadian students entering their final year of study in a minimum two-year welding undergraduate program.

Robert Third was also named a recipient of the award. Third has over 45 years of experience within the steel construction industry in design, project management and construction, with proven manufacturing capabilities existing in-house at George Third and Son. Third's industry connections have opened doors to facilitate joint venture partnerships with some of the largest steel fabricators in North America, the release states.

He is past chairman of the CISC, past member of the CISC board of directors, and past chairman of the SSEF where he was involved in supporting over 103 research projects at Canadian universities. He was also a past member of the board of directors for the Canadian Welding Bureau and past chair and honorary board member of the Endeavour Charity Society.

EllisDon named official partner of Canadian Paralympic Committee

The Canadian Paralympic Committee (CPC) and EllisDon recently announced a partnership that formalizes EllisDon's ongoing support as an official supplier of the CPC through 2024, including at the Beijing 2022 Paralympic Winter Games.

Last summer, the global Canadian Construction Services company provided operational services to CPC at the Tokyo 2020 Paralympic Games.

EllisDon's Infrastructure Services and Technology team will provide services at the Paralympic Village such as pre- and post-occupancy inventory and inspection, onsite operations and maintenance technical expertise, concierge support, furniture and equipment management and signage strategy and implementation, indicates a release.

EllisDon will also be supporting Para sport development across the country through direct contributions to the Paralympic Foundation of Canada.

"We are excited to officially be partnering with EllisDon for the next three years and look forward to continuing our great work together on a yearround basis," said Karen O'Neill, CEO of the CPC, in a statement. "There is

EllisDon is becoming an official partner of the Canadian Paralympic Committee (CPC). The partnership formalizes EllisDon's ongoing support as an official supplier of CPC for the next three years, including at the Beijing 2022 Paralympic Winter Games.

so much behind-the-scenes work that goes into bringing the Canadian Paralympic Team to the Games and Ellis-Don's expertise is helping us ensure we

provide athletes with a high performance environment so they can focus on their competition."

Construction to face economic challenges the rest of 2022: report

U.K.-based real estate and infrastructure consultant Turner & Townsend has released its 2022 Canadian Construction Market Intelligence Report which suggests inflation could stay elevated the rest of the year, impacting the construction sector.

The report provides market analysis and a construction cost guide for a range of building asset classes across major cities in Canada.

Canada's economy is expected to continue to grow despite the changing macroeconomic environment. The tight labour market and supply chain disruptions continue

to impact productivity and the availability and cost of goods and building commodities.

Locally, many provinces are experiencing stronger economic conditions, with a high volume of new job openings as firms increase hiring in anticipation of future demand.

Turner & Townsend expects several interest rate increases in 2022 could introduce volatility to the market. But, while the looming policy changes could impact the capital investment outlook for some industry segments, others are experiencing overwhelming consumer demand, such as data centres and supply chain logistics facilities, where speed-to-market and capacity remain paramount to their operations and revenue.

Additionally, ESG (Environmental, Sustainability and Governance) considerations are playing an ever-greater role in how and why capital is invested, prompting the construction sector to transform itself through innovation financial commitments to sustainable, net-zero policies.

The net result is likely to see some segments maintaining a "wait and see" position, the report stated, while others accelerate existing construction development plans to meet future regulatory and

consumer demands.

The report also spotlighted opportunities in Canada's natural resources sector, which accounts for over 15 per cent of GDP. Carbon capture, storage, and utilization technology is an opportunity for Canada's emission-intensive industries to maintain competitiveness in a net-zero world. While the technology may not be fully proven at large scale, several projects have commenced.

A pragmatic technologyand data-driven approach can help to minimize risk and maximize the value of these projects, suggested Turner & Townsend.

Brick recycling machine combats CO2

Continued from Pg. 1

Funded by the City of Montreal and Recyc-Quebec, SM provides advice to the city on economic and sustainable development, says Melissa Stoia, SM's co-ordinator and its director of sustainable development and the circular economy.

Calling the machine "a real revolution for the construction sector," Stoia says the industry "throws a lot of good, Quebec-made bricks to waste because it is faster" and less expensive than disassembling a wall and cleaning the bricks for reassembly.

More than 40 per cent of the waste in landfill in Quebec is from the construction industry, she says, noting reused bricks help reduce that percentage and eliminate greenhouse emissions resulting from the fabrication and transportation of new bricks.

She says many of the replacement bricks required for older residential and industrial buildings in the province are not made any more in Quebec but rather in the U.S.

Those bricks are often less durable in Quebec's winter climate.

Adding to the problem, Stoia says masonry contractors normally order 10 to 30 per cent more bricks than needed for each batch in case colour/ shade does not match.

"Once the renovation is done all the leftover (new) bricks go to waste."

Stoia is not aware of any other brick-cleaning products like Brique-Recyc on the market.

COLIRTESY CAROLINE PERRON PHOTOGRAPHIE

The bricks are "precisely aligned" by lasers on a conveyor belt which moves the brick between two diamond saw blades for mortar removal.

Chifa says Maçonnerie Gratton calculates the brick recycling machine can eliminate up to 5.9 tonnes of CO2 emissions in the restoration of a 1,000 square foot brick wall.

"Throughout Quebec and Canada this means a lot because we are all about bricks," Stoia says.

The recycling machine "sets the tone" for municipalities and the province to consider legislation on the reuse of construction materials.

She adds recycling bricks for reuse helps to conserve Quebec's architectural past.

Chifa says the company chose to use diamond-tipped cutters for mortar removal because they eliminate potential damage or weakening of the brick caused by traditional removal methods such as percussive hammers. To meet health and safety requirements, Brique-Recyc employs

a vacuum dust removal system.

She points out the speed of removal can be adjusted according to the "hardness of the mortar. Our cleaning is a simple process that doesn't require water."

Traditional cleaning methods remove less excess mortar and can involve the use of "extremely corrosive" cleaning agents, unhealthy to workers and hard on bricks, Chifa adds.

Brique-Recyc can be either mounted on rubber tires or on scaffolding via winching for in-situ cleaning.

While a date hasn't been set for marketing the machine, its launch is expected this year.

A number of companies have shown interest in the product, some from as far away as Vancouver and France, Chifa says.

Insurers flag the risks of mass timber construction

eading property insurers are cautioning project developers and builders concerning the risks unique to mass timber construction (MTC) that could affect insurability and premiums.

A 2021 white paper from Intact Insurance Specialty Solutions, the marketing brand for the insurance subsidiaries of Intact Insurance Group USA LLC, was not meant as a knock on wood so much as industry guidance.

"It is imperative for new building owners and general contractors to understand both the many advantages and disadvantages of mass timber construction. It's easy for them to be swayed by the cost, speed, esthetic, and sustainability of this type of construction. However, there's still research that needs to be done on the longterm effects of risk exposures before the industry chooses to go all in on mass timber. For the insurance industry, the potential damage to mass timber constructed buildings from smoke, fire and water must not be underestimated."

Intact acknowledges while MTC may not carry the same exact fire risks associated with wood frame construction, it still has similar risks that need to be assessed and underwritten.

Some of the unique risks arise before any site work is underway. Since many MTC components are fabricated off-site, care must be taken during transportation to prevent damage. Similarly, site storage prior to component assembly must provide protection against the elements, issues to which MTC is far more sensitive than steel or concrete.

The paper also addresses worksite issues, for example, sparking from any welding or cutting.

"A mandatory hot work program should be implemented and enforced onsite."

The larger the project, the more important are other measures that need to be taken.

"Site surveillance including watchman services, fire and intrusion detection alarm systems, and/or monitored cameras are much more important throughout all stages of construction than with projects that have non-combustible construction."

As a result, Intact cautions project developers.

"Compared to concrete, steel or any type of non-combustible construction, insurance costs may be significantly higher during construction and upon completion for the life of the building."

An even more comprehensive review of the risks unique to MTC comes from a white paper published last month by the RISCAuthority (Risk, Insight, Strategy and Control Authority) in the U.K., on behalf of the Fire Protection Association, the U.K's national fire safety organization. The paper was sponsored by 24 member insurance companies,

including Chubb, Zurich, Travellers and Allianz.

RISC acknowledges the growing interest in MTC while seeking, "potential solutions where the provision of affordable insurance might be problematic." It says, "further research is needed on several areas related to massive timber construction" and advocates that "at least half of multi-storey buildings should be non-combustible materials."

Climate and Construction
John Bleasby

Not surprisingly, concerns include the spread of fire through a building constructed of mass timber components.

"A significant change that the use of modern building methods employing combustible materials has introduced is a third dominant potential route for fire spread in combustible voids between the occupied compartments that may run both laterally and vertically throughout the building, even connecting with the external envelope"

Likewise, water damage is identified as a major threat to MTC buildings.

"Water exposures may result from flood, weather ingress, short term failure of water bearing systems, long-term low-rate exposures, pooling, and during fire-fighting activities. All have the ability to impact the structural integrity, function and esthetics of timber through primary (glue denaturing, delamination, swelling, staining) and secondary (rot, moulds, fungus) mechanisms."

Sudden fire exposure and longer term weakening due to water leave insurers pondering the question of structural collapse or "toppling."

"Concrete and steel structures generally collapse to their footprint area but there is limited knowledge as to whether there is potential for massive timber structures to topple. Poor collapse behaviour could have significant consequence for scale of loss and life safety."

Risk assessment is not a matter of regulations, the white paper cautions.

"For some (predominantly combustible) construction methods, compliance with building regulations alone might have little relevance to a building's insurability"

John Bleasby is a Coldwater, Ont.-based freelance writer. Send comments and Climate and Construction column ideas to editor@dailycommercialnews.com.

New policy a Canadian first: McNaughton

Continued from Pg. 1

The Working for Workers Act, 2022, if passed, would mandate workplaces that are at risk of a worker opioid overdose such as construction sites, bars and nightclubs, to have naloxone kits.

"To save lives we must get naloxone kits into people's hands. We must do everything possible and today we're turning our pain into action," said McNaughton, thanking Gillies and the OCC for their work and leadership on the issue.

"We have to be ambitious in fighting this epidemic. We have to propose solutions that match the scale of this crisis. This new policy is a first in Canada. It will help keep workers safe and also save clients, customers or anyone else in an emergency and it will be matched with support from our government to train workers and help employers get the kits they need."

The legislation also recommends training to ensure workers are familiar with how to use naloxone kits. In addition, the Occupational Health and Safety Act (OHSA) would not limit or prohibit the use of naloxone to clients, customers or anyone else in an emergency.

Paul Rosen, a Paralympic gold medalist, was also in attendance for the announcement. Rosen, 62, said he struggled for many years with addiction and mental health.

"When I retired after the Vancouver (Paralympics) my addiction was still going on and my mental health, and unfortunately not being a Canadian athlete anymore, everything went downhill," said Rosen, adding having naloxone available is critical.

"The opioid crisis in Ontario is massive and it's not the stereotypical addict that we think of. It's killing so many young men young women," said Rosen. "The biggest problem is we have incredible emergency services in this province but when somebody goes down and it takes three, four, five minutes for an ambulance to come...naloxone will get you to the hospital, it will save you."

Tibollo agreed the opioid crisis has been intensified by the COVID-19 pandemic.

"Ontario's construction industry and Ontario's workers never took a break during the pandemic," Tibollo said. "The proposed amendments to the Occupational Health and Safety Act, which includes requiring naloxone kits in certain workplaces and staff training on how to use them, is truly something that will support people with addiction

SCREENSHO

Monte McNaughton, minister of labour, training and skills development recently announced new legislation which, if passed, would require naloxone kits on every Ontario construction site. Naloxone, if administered in the early stages of an overdose, can reverse the effects and prevent death.

challenges and reduce harms resulting from opioid use."

The OCC recently released a second video as part of The Other Pandemic campaign featuring McNaughton, Giovanni Cautillo of the Ontario General Contractors Association, and Patrick Brown, mayor of the City of Brampton, discussing the opioid crisis in construction.

"Having naloxone kits on construction sites ultimately would be akin to the AEDs (automated external defibrillator) that you have onsite," said Cautillo in the video. "To me, in my mind there is no difference. If it even saves one person, it's worth having them on the sites. It just furthers the conversation and makes it not a taboo subject but instead part of our vernacular."

For more on the campaign visit TheOtherPandemic.ca. Also included in Working for Workers Two are changes to the OHSA and a proposal to increase the maximum fines for businesses that fail to protect their workers and follow workplace health and safety laws. This would reinforce the importance of putting worker safety first and further penalize those that treat injuries as the cost of doing business, McNaughton said. Businesses that do not provide a safe work environment that leads to a worker being severely injured or dying on the job could face fines of up to \$1.5 million under the OSHA if convicted, states a release, adding charges for other individuals are also rising to up to \$500,000.

The University of Toronto Scarborough (UTSC) is planning a new Retail and Parking Commons (the Project) on its north campus that will provide centralized vehicular parking and allow for the near and distant future development of the north campus. It will serve as a gateway for a significant number of visitors to campus. The design of the Project will consider its frontage on all sides in response to its location and in anticipation of the future north campus master plan build-out. Located on what is now surface Lot H, the Project will be six-storeys in height and total 42,877 gross square meters. It will provide approximately 1084 new parking spaces to serve both staff and faculty on the north campus, with permit parking on upper levels and short term parking for visitors and for students on the lower levels. It will include 25 accessible spaces and 217 electric vehicle charging stations. Furthermore, the Project will also provide 38 long-term bicycle parking spaces, Campus Parking offices, shelled space for the UTSC Bookstore and caf, and a centralized shipping and receiving facility for the district. The purpose of this RFP is to solicit Proposals from qualified construction management firms who will provide full construction management and construction services for the project, as more particularly described in this RFP. It is the intent of the Owner that the successful Construction Manager will enter into a contract in the form described in Section B.1. of this RFP. Tender Packages (as defined in Section H as "Tender Packages") are expected to be required for the performance of the work. An essential part of the Construction Management services to be provided is to ensure that the project: (i) will be delivered on time and on budget; and (ii) is designed and constructed in an efficient and cost effective manner. The successful Proponent will be required to engage in multiple costing and constructability reviews, as well as lead value engineering exercises, as necessary. at various stages to ensure that the project design and budget objectives are met. The Construction Control Budget is the sum total of the CM fixed fee, fixed payroll costs team, fixed general accounts, Design Assist and total of all the Tender Packages and is estimated to be approximately \$98 million inclusive of the Budgets for the Mass Timber Design Assist Partner involvement Part 1 - Preconstruction and Part 2 - Construction scopes as defined in Section F. No further details regarding the Construction Control Budget will be provided. The Consultant's Design Development documents will only be made available to Proponents who have signed the Confidentiality Agreement. Address of the New Retail and Parking Commons at UTSC: 1050 Military Trail (Official Record Municipal Address) M1C 3A8 Entrance Location: 40 Pan Am Drive

The Township of Clearview desires to retain the services of a design consultant and contractor team to provide a new combined firehall and public works building on the property of 5212 County Road 9 in New Lowell, Clearview, Ontario. This Request for Proposal is issued by the Township of Clearview (Township). The Township desires to retain the services of a design consultant and contractor team (Proponent) to provide a new combined firehall and public works building on their property at 5212 County Road 9, New Lowell, Ontario, to be known as the New Lowell Joint Operations Centre. This project also includes demolition and removal of existing structures on site. The project is to be delivered in the design build procurement method, with construction happening in 2022. Please refer to the detailed scope of work and available drawings and reports contained within the appendices for more information. The purpose of the Design-Build Proposal process is to enable the Township to select a qualified Design-Builder responding to the Request for Proposal (RFP) requirements and achieving the highest overall score in the evaluation for the Design-Build implementation of the abovecaptioned project. TRANSIT SHELTER \$50,000 est WASAGA BEACH, Simcoe, ON Multiple Locations, Wasaga Beach, L9Z 1A1

TENDERS DUE, 01-Apr-22 at 2:00 PM ET. Solicitation #: PW2022-19

Owner: Town of Wasaga Beach, 30 Lewis St., Wasaga Beach ON L9Z 1A1 705-429-3844 Fax: 705-429-

The Town of Wasaga Beach is soliciting quotations for the supply and installation of two (2) Transit Shelters for the Town s Transit System. project will involve the Proponent (supplier / manufacturer) of the transit shelter providing the Town with a proposal for their product and the associated price to supply and install the transit shelter and related accessories. Multiple products with associated pricing may be presented within the proposal. It is to be understood that the supplier / manufacturer, in submitting their proposal, may be interviewed with regard to their proposal, by the Town staff selection committee, so that the Town of Wasaga Beach can make an informed decision as the selected transit shelter as this will be the basis for continuity of future installation of transit shelters moving forward. Construction of the concrete pads will be completed by Public Works staff prior to delivery of the shelters. Documents can be obtained at: https://wasagabeach.bidsandtenders. The City is soliciting Bids from Contractors to construct a flood control wall around the area surrounding the Thornhill Community Centre. The flood control wall will be a permanent flood barrier to protect building envelope openings in the high-risk areas during extreme weather events. The elevation of the new Flood Control Wall is designed to divert flood waters that have previously accumulated and eventually spilled into existing below grade stairs, walkways, and doors. The objective of this Project is to advance Markham's Flood Control Program, which aims to increase the resiliency of existing infrastructure in order to address current and future flood hazard concerns related to extreme weather and climate change. Documents can be obtained at: https://markham.bidsandtenders.ca Question Deadline: Thu Feb 17, 2022 5:00 PM (EST)

615-3200 x8226 Fax: 905-615-4081 The City is looking to hire a Contractor to repair sidewalks across the City of Mississauga. The scope of work under this Contract involves the removal and replacement of concrete sidewalks that are not meeting the City of Mississauga s minimum maintenance standards (MMS) and/or considered to be deficient by the City's Representative. The associated removal and reinstatement/restoration of concrete curb, asphalt roadway, residential/commercial asphalt driveways, tree roots and sod will be required to facilitate the sidewalk repairs. A large number of locations are affected by existing tree roots and as a result, the City expects an appropriate amount of labour and equipment be assigned to remove tree roots as outlined in the specifications and as directed in coordination with the City's Forestry group. The University of Toronto Scarborough (UTSC) is planning a new Retail and Parking Commons (the Project) on its north campus that will provide centralized vehicular parking and allow for the near and distant future development of the north campus. It will serve as a gateway for a significant number of visitors to campus. The design of the Project will consider its frontage on all sides in response to its location and in anticipation of the future north campus master plan build-out. Located on what is now surface Lot H, the Project will be six-storeys in height and total 42.877 gross square meters. It will provide approximately 1084 new parking spaces to serve both staff and faculty on the north campus, with permit parking on upper levels and short term parking for visitors and for students on the lower levels. It will include 25 accessible spaces and 217 electric vehicle charging stations. Furthermore, the Project will also provide 38 long-term bicycle parking spaces, Campus Parking offices, shelled space for the UTSC Bookstore and caf, and a centralized shipping and receiving facility for the district. The purpose of this RFP is to solicit Proposals from qualified construction management firms who will provide full construction management and construction services for the project, as more particularly described in this RFP. It is the intent of the Owner that the successful Construction Manager will enter into a contract in the form described in Section B.1. of this RFP. Tender Packages (as defined in Section H as "Tender Packages") are expected to be required for the performance of the work. An essential part of the Construction Management services to be provided is to ensure that the project: (i) will be delivered on time and on budget; and (ii) is designed and constructed in an efficient and cost effective manner. The successful Proponent will be required to engage in multiple costing and constructability reviews, as well as lead value engineering exercises, as necessary, at various stages to ensure that the project design and budget objectives are met. The Construction Control Budget is the sum total of the CM fixed fee, fixed payroll costs team, fixed general accounts, Assist and total of all the Tender Packages and is estimated to be approximately \$98 million inclusive of the Budgets for the Mass Timber Design Assist Partner involvement Part 1 - Preconstruction and Part 2 - Construction scopes as defined in Section F. No further details regarding the Construction Control Budget will be provided. The Consultant's Design Development documents will only be made available to Proponents who have signed the Confidentiality Agreement. Address of the New Retail and Parking Commons at UTSC: 1050 Military Trail (Official Record Municipal Address) M1C 3A8 Entrance Location: 40 Pan Am Drive

WEST PARK REHABILITATION \$600.000 est **QUEENSVILLE, York, ON**

Ravenshoe Rd & Dr S, Queensville, LOG TENDERS DUE, 05-Apr-22 at 2:00 PM ET. Solicitation

#: CSD2022-019 Owner: Town of Georgina, 26557 Civic Centre Road, Keswick ON L4P 3G1 905-476-4301 Fax: 905-476-8100

West Park is a sports park that was developed in the early 1980s and serves as a major destination in south Keswick, in the municipality of Georgina, for both residents and visitors. West Park includes lit and unlit baseball diamonds, unlit soccer fields, a playground and parking. The park is bordered by Lake Drive to the west, Ravenshoe Road to the south, and regenerated woodland and wetland to the east and north (site). Approximately three hectares of the park is regulated by the Lake Simcoe Conservation Authority (LSRCA) due to its proximity to a provincially significant wetland, its location on a highly vulnerable aquifer and poorly draining soil conditions. The four (4) baseball diamonds and fencing are reaching the end of their useful life, and combined with the need to bring them into compliance with applicable safety standards, are due for repair and replacement. Therefore, The Corporation of the Town of Georgina (Town) is seeking bid submissions from qualified vendors (respondents) to repair and replace the four (4) baseball

PORTABLE CLASSROOMS RELOCATION **SERVICES \$400,000 est** OTTAWA, Ottawa, ON

Multiple Locations, Ottawa, K1P 1A5

TENDERS DUE, 22-Mar-22 at 3:00 PM ET. Solicitation #: 22-117

Owner: Ottawa-Carleton District School Board, 133 Greenbank Rd, Nepean ON K2H 6L3 613-721-1820 Fax: 613-820-6968

Con Admin: Ottawa-Carleton District School Board, Richard Meincke, 133 Greenbank Rd, Nepean ON K2H 6L3 613-596-8767 Fax: 613-820-6968

The District estimates that approximately 20 to 40 portables will require relocation over a four/ five week period beginning the first week of July and ending the first week of August. Other portables may require movement throughout the year depending on requirements. This estimate is not a guarantee of future volume of work and is provided for information purposes only. In order to meet contract requirements, it is imperative that the Contractor be willing and capable of relocating the volume of portables as estimated by the District in the timeframe stated. It is extremely important that the Contractor is able to maintain the portable movement schedule when provided by the District. Delays that would jeopardize the schedule are unacceptable. Bid submissions that do not confirm the Contractor s ability to meet the estimated relocation volume, in the judgment of the evaluation committee, will not receive consideration for contract award. Documents are available at: https://ocdsb.bidsandtenders.ca/

Construction start 01-Jun-22; Completion by 31-May-

REHABILITATION OF BRAE-LOCH ROAD \$1,000,000 est SIDE. Renfrew.

Brae Loch Rd, Braeside, KOA 1GO

TENDERS DUE, 08-Mar-22 at 2:00 PM ET. Solicitation #: PW-2022-03

Owner: Township of McNab/Braeside, 2508 Russett Dr., Arnprior ON K7S 3G8 613-623-5756 Fax: 613-623-9138

Con Admin: Township of McNab/Braeside, Ryan Frew, 2508 Russett Dr., Arnprior ON K7S 3G8 613-623-5756 x227 Fax: 613-623-9138

Civ Eng: Planmac Engineering Inc, Jeff Huang, 115-92 Caplan Avenue, Barrie ON L4N 9J2 705-719-7981 Fax: 416-622-6710

The Township of McNab/Braeside is rehabilitating approximately 3.6 km of Brae-Loch Road from McLean Drive to approximately 400m south of Scheel Drive. The contract shall have the following two phases: - Phase 1: From McLean Drive to Stevenson Drive - Phase 2: From Stevenson Drive to 400m South of Scheel Drive (south project limit) Phase 1 will be carried out in the 2022 construction season, and Phase 2 will be carried out in the 2023 construction season. As part of the work in Phase 1 for 2022, the roadway surface shall be pulverized

for the entire project limit and leaving the section from Stevenson Drive to the South Project Limit in gravel. The work will include in-place processing of the existing surface, lane and shoulder widening, supply/placement of granular material, and asphalt paving. Work will also consist of drainage improvements together with road crossing culverts, with disturbed areas to be treated with topsoil and seed. Complete tender documents may be obtained digitally free of charge from the Township of McNab/ Braeside, by emailing their representative as noted below. Email for tender document registration: rfrew@mcnabbraeside.com with the subject line "Tender Request - Rehabilitation of Brae-Loch Road"

RFP D/B - SUPPLY AND INSTALLATION OF **NEW ACCESSIBLE PLAYGROUNDS WITH NEW ENGINEERED WOOD CHIPS AT CHALMER'S PARK AND WELCOME PARK** \$90,000 est

PORT HOPE, Northumberland, ON Multiple Locations, Port Hope, L1A 3Z9

TENDERS DUE, 16-Mar-22 at 11:00 AM ET. Solicitation #: 08P-PRC-2022

Owner: Municipality of Port Hope, 56 Queen St., Port Hope ON L1A 3Z9 905-885-4544 Fax: 905-885-7698

This RFP is being issued, primarily as a means of securing a qualified contractor for the supply and installation of 2 New Accessible Playgrounds. These Playgrounds will be located at Chalmer's Park in Port Hope and Welcome Park in Welcome. The budget allotted for this project is \$90,000.00 net HST. Respondents are asked to supply up to three (3) detailed proposals for each park, illustrating how they would design and outfit the accessible playgrounds for optimal results in addition maximizing the play area. Each design shall be different and shall be creative, we encourage you to think freely. The design of the playgrounds must be different from each other and different in layout than other Municipal parks such as East Beach, Wladyka Park and Baulch Road. The Municipality is looking for creative design and layouts to enhance perience of the kids using the parks. SUPPLY AND INSTALLATION OF PIPE SUB-DRAINS \$200,000 est

MIDDLESEX CENTRE, Middlesex, ON

Multiple Locations, Middlesex Centre, NOL 1E0 TENDERS DUE, 09-Mar-22 at 12:00 PM ET. Solicitation #: M-E-22

Owner: County of Middlesex, 399 Ridout St N, London ON N6A 2P1 519-434-7321 Fax: 519-434-0638

Scope of Work: The work includes supplying all labour, equipment and materials to install heavy wall plastic tile shoulder drains on both sides of the roads at locations designated by the County. Outlet pipes will be installed by the County. Specifications for Supply and Installation of Pipe Sub-drains: -The sub-drain shall be 100 mm (4") diameter perforated plastic tubing of a minimum weight of 175 grams/ft. - The tile shall be installed by plowing to a minimum depth of 500 mm at a location 1.0 m. from proposed edge of pavement or as set by the County. Minimum grades shall be 0.25% and grades shall be set using a laser where pavement grades are flat. - These roads will be resurfaced after the drains are installed. However, effort must be made by the contractor to avoid damaging existing pavement. Any excessive damage caused by the contractor during sub drain installation shall be re-instated prior to final paving. - Low points in the grade are to be marked by the Contractor. - The County will be responsible for restoring the gravel shoulder - It is agreed by the Contractor that in case the work is not completed by the completion dates specified, the balance of the remaining work is cancelled and there will be no payment made to the contractor for any work not completed including the supply or restocking of materials. Repro: Merx, 6 Antares Dr, Nepean ON K2E 8A9 800-964-6379 Fax: 888-235-5800

Proponents must submit an executed Non-Disclosure Agreement in order to be provided with access to the Request for Proposal documents. The executed NDA must be submitted by e-mail in PDF format to Prabhdeep Singh Virdi (Prabh deep. Vir di@infrastructureon tario.ca).Please ensure the NDA is authorized by an individual with the authority to bind the Respondent. Request for Proposals for Weeneebayko Area Health Authority Redevelopment Project. Infrastructure Ontario (IO) and Weeneebayko Area Health Authority (WAHA) have issued this Request for Proposals (RFP) for a team to deliver the WAHA Redevelopment Project. The WAHA Redevelopment project involves the construction of a new hospital, Elder Care Lodge, visitor hostel and staff accommodations in Moosonee and a new Ambulatory Care Centre on Moose Factory Island. These modern facilities will support WAHA in providing exceptional, culturally sensitive healthcare to patients and clients living along Ontario's James Bay and Hudson Bay coasts, many of whom are Indigenous. The new health campus in Moosonee will include: - 36 inpatient beds, in private rooms; - A larger 24-hour Emergency Department; - Modern surgical suites; - Dialysis; - Expanded mental health and addictions programming; - Improved primary health care services; - Lab/Pharmacy/ Diagnostic Imaging: - Traditional Healing: A new 32-bed Elder Care Lodge; - A hostel for patients and visitors; and - Residences for The new ambulatory care centre on Moose Factory Island will include: gency health services; - Access to primary health care; - Diagnostic imaging capabilities; - Physiotherapy; - Dental; - Dialysis; - Ontario Telemedicine Network; - Traditional Healing and Spirituality; and - Health promotion programming The successful bidder at the conclusion of the RFP process would work in collaboration with IO and WAHA, under a Development Phase Agreement, to further define and refine project requirements and design, pricing, and risk parameters. Additional Bidding Instructions: Proponents shall submit their Preliminary Technical Assessment Submission to the Sponsors using the Electronic Submission and Evaluation System (AWARD) through the Phase 1 Submission Portal. Proponents are reminded that pre-registration for the Electronic Submission and Evaluation System (AWARD) is required. Please see the User Guide uploaded as part of the Background Information Documents on MERX. Proponents are requested to register in AWARD under their Proponent name for the purpose of submitting a Preliminary Technical Assessment Submission via the Phase 1 Submission Portal Official bid docu-

Post-Bid Reports

How to use the Post-Bid Reports

The Post-Bid Reports section of Daily Commercial News include Bid Results, Awards and projects Under Construction. Projects located throughout Ontario are reported.

Bid Results

The Daily Commercial News Bid Results section includes reports on projects announcing results after the receipt of tenders. Reports include the names and bid prices of low bidders, and the name of the successful contractor.

The Daily Commercial News Starts section includes reports from building permits. Look for jobs you have been following or new jobs in your area of interest.

Regions included:

Central Ontario

Includes census divisions of Durham, York, Toronto, Peel, Halton, Dufferin, and Simcoe

Building Reports can also be found by using CCPI online at https://app.constructconnect.com/search.
Need Help? Contact 1-800-959-0502.

Eastern Ontario

Includes census divisions of Northumberland, Prince Edward, Dundas-Stormont-Glengarry, Prescott-Lanark, Leeds-Grenville, Frontenac, Addington, Hastings, Peterborough, Lennox-Addington, Hastings, Peterborough, Kawartha Lakes, Haliburton, Renfrew, Muskoka, Nipissing, Parry Sound, and Ottawa

Western Ontario

Includes census divisions of Niagara, Hamilton, Waterloo, Haldimand-Norfolk, Brant, Oxford, Perth, Elgin, Chatham-Kent, Essex, Lambton, Middlesex, Huron, Grey-Bruce, and Wellington

Northern Ontario

Includes census divisions of Kenora, Rainy River, Thunder Bay, Cochrane, Algoma, Sudbury, Timiskaming,

www.dcnonl.com/certificates-and-notices search all Certificates of Substantial Performance, Certificates of Completion of Subcontract, Notices of Intention to Register a Condominium, Notices of Non-Payment of Holdback, and Notices of Termination.

NOTICE: Effective July 1, 2018, amendments to the Construction Act are reflected in the Certificates and Notices section of Daily Commercial News. These amendments required minor changes to the forms for Certificate of Substantial Performance (now called Form 9), Certificate of Completion of Subcontract (now called Form 10), and Notice of Intention to Register a Condominium (now called Form 11). The amendments also required publishing of two new notices: Notice of Non-Payment of Holdback using Form 6, and Notice of Termination using Form 8. To learn more about the amendments, visit www.dcnonl.com/ construction-act.

Visit www.dcnonl.com/submit-manual to download Forms 6, 8, 9, 10 and 11.

To publish certificates and notices, email dcncertificates@constructconnect.com or fax 1-800-947-7966. For more information call 905-752-5482.

Those placing notices are responsible for ensuring Daily Commercial News receives, by fax or otherwise, all necessary information and for reviewing Daily Commercial News upon publication for any errors or omissions and advising Daily Commercial News at once. Daily Commercial News will make good any errors or omissions attributable to it in the next available issue, but will otherwise bear no liability whatsoever for any failure to publish any notice, however caused and even if arising from Daily Commercial News' own negligence.
