Service Disruption

DCN provider confirms 'cyber security incident'

The Daily Commercial News (DCN) digital edition provider PressReader has confirmed via a notice on Twitter the network outage it experienced last week, and continues to address, has been classified as a cyber-security incident.

At this point there's no evidence customer data has been comprised.

However, as a result of these ongoing issues, there may still be service delivery delays with some editions of the digital DCN. So just in case, you can access our DCN digital edition below for all your news and reports.

Thank you for your patience as we look to rectify these issues.

Ontario contractors bullish on growth in 2022, survey reveals

DON WALL STAFF WRITER

ntario contractors are significantly more confident in the future of the construction economy this year compared with last year, according to a newly released survey from the Ontario Construction Secretariat (OCS).

The percentage of contractors saying their business is growing almost tripled from last year. Forty-three per cent of contractors expect to hire more workers this year than last and 52 per cent expect higher revenues this

The positivity comes despite significant threats to growth -77 per cent of contractors have experienced significant supply chain disruptions in the past year, and 52 per cent of contractors have had projects postponed by the owner in 2021-22. Thirtyeight per cent of contractors reported projects have been cancelled in that period.

The annual contractor confidence survey, undertaken in January, was released March 3 at the OCS's State of the Industry and

Outlook Conference, held in-person in Mississauga.

"We are starting to feel more confident that we are emerging from the pandemic, and we are seeing that reflected in the attitudes of Ontario ICI construction businesses," said OCS CEO Bob Bronk.

Overall, 82 per cent of the 500 ICI contractors surveyed have a positive outlook on Ontario's construction industry, with 36 per cent stating they believe they will do more business this year compared to last and 48 per cent forecasting that their business will at least stay the same.

Confidence was highest in central Ontario (39 per cent) and eastern Ontario (38 per cent) while contractors in the GTA were aligned with the provincial average of 36 per cent.

"Pretty much everyone's in tune...anticipating a strong 2022," stated OCS director of research Katherine Jacobs, noting no major pockets of negative sentiments. 'That was an interesting observation and again it gives us further

Towers are on the rise for The Well mixed-use development at Front and Spadina streets in Toronto. Diamond Corp., RioCan Real Estate Investments and Allied Properties REIT are the owners and the construction manager is Tridel Corp. The project includes one 36-storey office tower with underground parking being built by EllisDon and six residential towers that will range from 14 to 46 storeys with a total of 1,700 suites and amenities in each tower. The overall project will have over one million square feet of office space and 500,000 square feet of retail and food services throughout the buildings. Completion on the office and retail portion is scheduled for 2022 and the residential towers have been scheduled for 2023. The project was designed by Hariri Pontarini Architects (design), Adamson Associates Architects (executive), Wallman Architects and architectsAlliance (residential towers). Consultants are Read Jones Christoffersen/Jablonsky Ast & Partners (structural), Novatrend Engineering Ltd. (mechanical/electrical) and Claude Cormier & Associes Inc. (landscape).

SAC applauds Ontario Housing Task Force report recommendations

MISSISSAUGA, ONT.

The Surety Association of Canada (SAC) is lauding the Ontario Housing Task Force report and recommendations released last month.

The task force released its report to Steve Clark, minister of municipal affairs and housing, in February.

The task force was appointed by the premier in December to provide solutions to the province's current housing crisis and specifically to provide recommendations for making homes more affordable and encouraging private sector development.

One of the key recommendations of the report calls for a requirement for municipalities to offer developers an option of securing their obligations under a subdivision agreement by posting a subdivision surety bond.

SAC president Steve Ness called the report "a commonsense approach that would sweep away the barriers and incentivize the private sector to build homes and make housing more affordable for Ontarians."

Ness said allowing developers to post bonds as security will free up the capital needed to invest in new housing projects.

Developers in Ontario have their cash tied up as security for existing projects. Replacing these deposits with subdivision surety bonds would free up that money to invest in more housing developments."

Under the terms of municipal subdivision agreements, developers are required to install various site services and utilities, indicates a SAC statement, adding most municipalities also require that the developer provide financial security to guarantee the performance of these obliga-

According to the report, municipalities across the province almost universally require home builders to secure these obligations by posting a letter of credit from a chartered bank and these bank guarantees create problems for developers by tying up the working capital and borrowing power needed to carry on operations and finance additional projects, adds the release.

"By contrast, Subdivision Surety Bonds are non-intrusive and free up the capital required to invest in these sorely needed development projects and ease up the constraints on Ontario's housing supply," the release

Riveting Contest for Dominant Share, Singles vs Multiples, in Major Cities (Part 2)

There's an important contest underway in America's cities to determine the balance between singlefamily new residential construction and multi-family properties. The outcome is crucial to determining the preponderance of other types of construction that will

For example, there's a strong symbiotic relationship between high-rise multi-family construction, as rental or condo developments, and rapid transit work. Strong ridership feeds a demand for close-by accommodation. High density at transit hubs fuels subway and LRT passenger counts.

Interestingly, in 2021, two-thirds of the 36 most populous U.S. cities experienced more single-family starts than multi-family starts (both measured in units). For the U.S. as whole, including smaller centers and rural communities, the singles-to-multiples ratio was vastly in favor of the former.

But the flip side of the story is that one-third of the 36 most populous cities in the U.S. in 2021 had multi-family starts that

Alex Carrick

were higher than single-family starts (again, both in units). Those dozen cities were Austin, Boston, Denver, Los Angeles, Miami, Minneapolis, New York, Philadelphia, San Diego, San Francisco, Seattle, and Washington DC.

The reader will notice that many of those 12 cities have pronounced high-tech sectors that pull in well educated, highly motivated and mobile young workers.

Furthermore, in six of the 12 cities specified above, the number of multi-unit starts was double the number of single-family starts. Boston, Miami,

New York, Philadelphia, San Francisco, and Seattle were the half dozen that pulled off that feat. By the way, in San Jose, the number of singles to multiples was

basically the same. In Canada, the give-and-take between singles and multiples has been clearly decided in favor of the latter. Multi-unit starts in Toronto in 2021 were 83.5% of the city's total. In Montreal, the share was a stunning 91.0%; in Vancouver, 88.4%.

U.S. SINGLE-FAMILY & MULTI-FAMILY HOUSING STARTS SEASONALLY ADJUSTED AT ANNUAL RATES (SAAR)

In Jan 2022, single-family starts were -5.6% m/m and -2.4% y/y; multi-family starts were -0.8% m/m, but +8.3% y/y. The pattern since 2015 has been for the singles number to keep growing while the multiples number has stayed mainly flat. Muliples now appear to be reviving.

The last data points are for January, 2022.

Data source: U.S. Census Bureau (Department of Commerce) / Chart: ConstructConnect-CanaData.

Local, international planning officials talk obstacles to building affordable housing

ANGELA GISMONDI

STAFF WRITER

lack of housing supply is an issue that's not unique to Canada as places around the globe are facing similar challenges. Although cities are aware the problem exists, there is no clear cut answer on how to fix it.

That was the consensus during the Housing Supply Summit 2022: Solutions to Build More Homes hosted by the Residential Construction Council of Ontario (RESCON). The session, Learning from Other Jurisdictions – An International Perspective, brought together planning professionals from at home and abroad to discuss the challenges that cities face when it comes to creating housing.

"We in Toronto see the supply side of the equation as part of the answer for the housing problem," said Ana Bailao, deputy mayor with the City of Toronto and chair of the planning and housing committee. "The market side of things is never going to create, for example, the supportive housing with deeply affordable housing that we need, so I think it is important to recognize that governments still need to invest in deep affordable housing."

The City of Toronto is also looking at creating missing middle housing by approving laneway housing, garden suites and a new inclusive zoning policy.

"We need to use all of our tools to nudge the development that we need and the supply that we need being tax tools, development charge tools, land planning, rezoning," said Bailao. "These things need to be aligned. If what we need is the missing middle, the bigger units, we need to make sure that all these tools favour those kinds of units."

<u>Anette Scheibe</u>, head of city planning with the City of Stockholm, said the strongest tool the city has is its land use policy, with guidelines for housing provisions.

"The City of Stockholm, we own 70 per cent of the land within the city," said Scheibe. "We can use the land use policy to reach the city's goal to enable the construction of 140,000 new homes between 2010 and 2030. Fifty per cent of those 140,000 new apartments will be rental apartments."

The city has a challenge when it comes to affordable housing and more needs to be done, she added.

<u>Catherine Stone</u>, director of spatial planning with the Western Cape Government in South Africa, said if the state isn't releasing its land, it makes it difficult to introduce a pol-

icy placing obligations on private developers for affordable housing.

"In South Africa cities have land parcels owned by different spheres of government and real challenges around trying to unlock that land," she said. "The provincial government has also committed to releasing its land and reviewing its land and where it is appropriate for housing looking at 50 per cent of that being affordable. But these developments largely have to pay for themselves."

A much quicker approvals process is needed, she added.

"There is a lot of cynicism around that because currently it is difficult to get quick planning approval and this is one of the very significant cost drivers in the Western Cape for property prices," Stone said. "We're having to work with municipalities and at the same time to try and urge them to understand what is driving the long timeframes and where can we get better efficiencies, also recognizing that we as a provincial government play a role in related permission such as heritage and environment. So a great deal of co-ordination is needed."

Bailao said the process needs to be more collaborative between the industry and the municipality.

"I am a councillor. I deal with these applications regularly, and sometimes yes, there are many delays on the municipality but sometimes there are delays on the developer as well," Bailao noted.

"Everybody is a little bit at fault, so we need to make sure we are working in a collaborative, co-operative way. I think (we need) the capacity and see what policies we can change and bring some technology innovation to create some accountability and speed up the process."

Scheibe said the state level needs to do something about the development process because currently it's too cumbersome.

"This is a big issue right now in Stokholm or in Sweden," she said. "It's too hard, the process is getting more and more complex and we can't wait so we have to discuss overall the regulation, the planning process, the whole concept of it and also the standard actually in what we build."

Stone echoed the concerns around elaborate regulation processes and suggested doing more planning up front.

"It's hard work and it's difficult and it's messy, but that is also something we're looking at to try and ease the way further downstream in the planning permissions processes," said Stone.

What is builder's risk insurance and why does it matter?

AHARSHAN THANGARASA CONTRIBUTING COLUMNIST

ny general contractor, subcontractor or small construction business with a financial stake in a project needs the protection a builder's risk policy provides. Here's what you should know.

Every construction site poses a certain amount of danger in that incidents, unexpected events or damages may occur regardless of how conscientious you are about safety. So while your risk management plans may be meticulous and you have comprehensive safety protocols in place, you always need a backup strategy in case something goes awry.

For general contractors, that means having a <u>builder's risk insurance policy</u>. Also known as course of construction insurance, a builder's risk policy is designed to protect your construction projects from specific kinds of property damage. It also typically includes coverage for expenses related to construction should property damage occur and delay the completion of a project.

A property owner should also purchase builder's risk if, for example, they hire contractors to do major renovations or build additions to a building or home. But, depending on the type of construction contract, general contractors should have this policy in their back pockets.

Moreover, it's possible the municipality where your construction project is will require you to show proof of builder's risk policy before the city will issue you a permit. Usually, both you as the general contractor, and the building owner, need to be named in the policy.

How builder's risk insurance can protect your construction project

Any general contractor, subcontractor or small construction business with a financial stake in a project needs the protection a builder's risk policy provides. The same can be said of architects and financial lenders.

In general, a builder's risk policy protects construction projects from a broad range of property damage, including fire, explosions, theft and vandalism, and severe weather events such as lightning, hail or a tornado or hurricane. In addition, it provides financial coverage for the cost of repairing buildings or structures under construction, as well as your materials, supplies and the equipment you have onsite, in transit, or

at another location.

For example, suppose you're conducting construction work at a new residential housing project. During the night, vandals break into the building where you're working and cause significant damage to the area by igniting a fire. A builder's risk policy would cover the cost of repairing and cleaning up the damages so you can complete the project.

Of course, every construction project is unique, and your policy needs to be customized to suit your needs. That may mean extending the coverages in your policy for things such as temporary structures, scaffolding, pollution cleanup or debris removal. But as with any insurance policy, there are exclusions to what you are covered for and builder's risk insurance will typically not cover floods, employee theft, mechanical breakdowns of equipment, or damages resulting from faulty design, planning or materials.

Does a builder's risk policy cover all liability risks?

As a builder's risk policy is designed to protect construction sites from losses and damages, it does not typically include additional liability such as coverage for thirdparty bodily injury, property damage or incidents in the workplace. You would need to add premises liability coverage to the policy, although some builder's risk policies include premises liability coverage (depending on the insurance company). Or you can add what's known as "wrap-up liability" for high-value projects such as large commercial spaces or condo highrises, which applies to a specific project and covers contractors and the property owner involved in the project.

Regardless of the type of project you're undertaking — residential, commercial, or industrial — or its size, a customized builder's risk policy is a must-have. After all, it serves as the backbone of your risk management strategy.

Contractor confidence spiking over 2021

Continued from Pg. 1

Jacobs said it was a positive sign that for the first time since the confidence survey has been undertaken, in the category of sources of new work, new construction surpassed maintenance work, 55 per cent to 45 per cent.

"New construction is much stronger this year than it has been in the past," she said. "That's the highest percentage that we've ever achieved when we asked that question."

Among other survey results:

- 40 per cent of contractors reported higher revenues in 2021 compared to 2020, with an increase of two per cent, on average, in revenue increase.
- In addition to the 52 per cent of contractors expecting higher revenue for 2022, 33 per cent expected revenue to remain the same. Contractors expect an average increase in revenue of 10 per cent in 2022.
- Pre-pandemic, about 60 per cent of contractors said their business was growing. As of January 2022, 34 per cent thought it would grow, compared with only 12 per cent last year, and 54 per cent thought it would remain the same, similar to the 57 per cent last year.

"We're starting to see some improvement as we're moving further away from the pandemic," said Jacobs. "We're not quite at that 60 per cent that they said pre pandemic but we're moving in the right direction."

Project Disruptions Reasons for Project Cancellations 27% Material Costs/Availability/Dulays 19% General Costs Increases 16% CovID-19 Effects/Restrictions/Dulays 14% Lack of Funding/Financing from Owner 5% Changing Priorities of Owner 5% Permit Delays 3% Economic Uncertainty 3% Subcentractor/Labour Availability STATE OF THE INDUSTRY & OUTLOOK CONFERENCE Reasons for Project Cancellations 27% Material Costs/Availability/Dulays 19% General Costs

The Ontario Construction Secretariat's annual contractor confidence survey was released March 3 at the OCS's State of the Industry and Outlook Conference.

• Among the 43 per cent of contractors that expected to hire more employees this year, the top three approaches to attracting or retaining workers were raising wages, promoting employees and improving benefits. The average increase in hires is expected to be eight per cent. About half of the employers expect to maintain current staffing levels.

• Of the 52 per cent of contractors that have had projects postponed in 2021/22, 66 per cent had seen projects rescheduled. "That is positive news for the industry," said Jacobs.

The top reasons for project cancel-

lations: 27 per cent was for materials

costs, availability or delays; 19 per

cent was general cost increases; 16 per cent was related to COVID; and 14 per cent was related to financing.

• Strategies to manage supply chain disruptions included seeking alternative suppliers (80 per cent), accelerating materials purchases after winning the contract (73 per cent), identifying alternative materials in the contract (67 per cent) and stockpiling materials (63 per cent).

Jacobs reported on contractors' observations in a comments section, noting employers praised the increase in health and safety on worksites.

Another comment was, "Some of the fly-by-night companies have been weeded out of the industry."

Thomas shares philosophies on giving back to the community, mentorship

Continued from Pg. 1

"It's actually a lovely merging of all my worlds, like the volunteerism that I believe in throughout my lifetime, where now I get paid to do what I love to do. It's amazing because I've got the support of Rosendin to do this work," she said of her appointment.

Supported by corporate profits and proceeds from fundraising efforts, the foundation aims to serve the communities the contractor works in, addressing such problems as food insecurity, mental health, suicide prevention and domestic and child abuse.

"It's really important to give back to our communities because we are people who live and work in our communities. For me it's nice because I'm able to lead this effort, and really be strategic and do the research and understand what are the issues that are plaguing our local communities."

Efforts to support mental health in the community directly help construction workers who might be vulnerable to suicidal thoughts, said Thomas

"There's a high suicide rate in our industry, and we recognize that we need to be there to support others in our industry, and our own folks as well. It's a tough time right now."

Rosendin's diversity and inclusion committee takes its responsibility to promote a "culture of caring" seriously, said Thomas.

Employees who have taken the pledge know they have safe spaces to go to if they are having a bad day, she said, and recently during a meeting with a foundation beneficiary she learned that if someone on staff is seen to be filling in legal forms, it could be that the person is contemplating suicide and wrapping up their affairs.

"When you start noticing your co-workers acting differently than they normally do, it's very, very important to take the time and check in because you never know what's

J THOMA

National Association of Women in Construction (NAWIC) camps introduce girls as young as eighth graders to basic construction trade skills, teach them the value of working co-operatively and reward them with a set of work tools. Rosendin Foundation president Jolsna Thomas (third row left, in sunglasses) said NAWIC hopes to raise awareness of construction as a potential career as early as possible.

going on."

As an accomplished woman in the male-dominated world of construction, Thomas has long taken her role as a mentor to other women in the business seriously, participating as a sponsor and an advocate within the company and becoming an active member of the National Association of Women in Construction (NAWIC). She noted the industry has made strides in embracing women since she joined 15 years ago, with women now making up about 11 per cent of all employees in the sector. Thomas believes the key to further recruitment and retention is aggressive training of staff across the company to promote inclusion and eradicate hostile behaviour.

"The way you stamp it out is when you train and educate your people so they know that that is not acceptable behaviour. Then you've now created a completely safe space for people to be able to grow," she said. "We have a lot of training in place, but there's also a lot of training of manage-

ment. There's a lot of training of staff. There's a recognition of the importance of people because we value our people."

Diversity is a key value to encourage because it allows people to be recognized for their full set of talents and allowed to flourish, Thomas said. In mentoring situations she often hears that mentees are hesitant to apply for job promotions because they don't want to be boastful, whereas a man with only 30 per cent of the required skills on a job application will not hesitate to throw his name in.

"If others know about you within your company, they can promote you as well. They get to recognize what your talents are and what you bring to the table as women.

"We bring so many amazing talents and skills to the table. We've got leaders in our engineering team and our business team, project management, division managers...we can show the next generation that there's a place for you."

Cordless tools challenge lithium's upper limits

If the 2022 World of Concrete was any indication, the heavy-duty capabilities of cordless tools have reached new heights. At the Las Vegas show, all major manufacturers displayed comprehensive arrays of battery-powered tools capable of cutting, drilling and grinding concrete and chipping hammers for demolition.

The development of compact, powerful cordless tools over the past few years has made a positive impact on jobsites. Setting up for work is much more efficient now that power cords, outlets and generators are largely eliminated. Workers can quickly and easily move from task to task. Power cable hazards and electrical circuitry concerns have been reduced.

But how powerful can these cordless tools get?

At the heart of all these are rechargeable lithium-ion battery packs, typically 20 and 40 volt units, used either singly or in groups.

Lithium is constantly in the news. It has found wide application as a power source for devices as small as watches and as large as EV transport trucks.

The adoption of lithium-ion has accelerated the practicality of cordless tools. Earlier versions of cordless tools used nickel cadmium (NiCad) batteries, explained Sean Fitzgibbons, group product manager for Stanley Black & Decker. Among various concerns, NiCad batteries suffered from environmental and over-charging problems.

However, there are also limits to what lithium-ion battery packs can do, particularly when it comes to the balance between deliverable power and the size and weight of the power units.

"If more power/runtime is desired, one could either add more cells to the battery, or increase the cell size, but either choice leads to a size/weight penalty for the end user," Fitzgibbons told the Daily Commercial News.

DEWALT's solution has been development of POWER-STACK™ 20V MAX compact batteries. The company says these provide 50 per cent more power while being 25 per cent smaller and 15 per cent lighter.

DEWALT intends to, "leverage this technology to service a broadening spectrum of user needs," Fitzgibbons said.

"We envision the development of new batteries with POWERSTACK™ Battery Technology to correspond with the expansion of cordless tool applications."

Longer term, however, is the question of lithium-ion's future.

Rapid demand growth, particularly over the past five years as EV production has ramped up, has resulted in a global shortage of lithium and prices eight times higher today than 12

months ago.

Aside from price increases and supply shortages, the process surrounding lithium's production is an increasing concern. Although an element on the periodic table, lithium does not occur freely in nature but instead is found bonded to igneous rocks. Consequently, the heavy use of groundwater, soil and water pollution, and the carbon emissions associated with mining, are viewed as environmentally harmful as any end-use fossil fuel reduction benefits derived from lithium batteries.

Inside InnovationJohn Bleasby

Cobalt, typically used in lithium-ion batteries, is also questioned due to human rights abuses and the mining techniques in the Democratic Republic of the Congo.

In response to these numerous issues, experiments are being conducted all over the world in an effort to find alternatives for lithium-ion.

While researchers at the University of Texas at Houston believe a rechargeable cobalt-free battery is one day possible, they have in the meantime developed sodium-sulphur batteries that resolve many of the concerns surrounding lithium-ion. Both sodium and sulphur are cheaper and more widely available than both lithium and cobalt. These developments also address the issue of dendrites in the battery structure that can cause rapid battery degradation, short-circuiting, fires and explosions.

NAWA Technologies based in France has designed and patented an <u>Ultra-Fast Carbon Electrode</u> that they say boosts battery power 10 times and battery life cycle five times, while increasing energy storage three times

At the University of California-San Diego, engineers have conducted tests of an all-solid-state silicon battery that may have wide applications. And at nearby UofC-Irvine, nanowire batteries have been found to be capable of so many recharging cycles that they might last forever.

Lithium aside, this points to a promising long-term future for rechargeable cordless tools.

John Bleasby is a Coldwater, Ont.-based freelance writer. Send comments and Inside Innovation column ideas to editor@dailycommercialnews.com.

Aecon reports nine per cent revenue growth in 2021

TORONTO

Aecon Group's 2021 year-end report announced revenue growth of nine per cent over 2020 and new project awards in 2021 in Vancouver, Montreal, Toronto and elsewhere.

The statement reported results for year-end 2021 with full year revenue of \$4 billion and backlog of \$6.2 billion as of Dec. 31, 2021.

The reported backlog as \$6.198 billion compares to a backlog of \$6.454 billion as of Dec. 31, 2020.

New contract awards of \$3.721 billion were booked in 2021 compared to \$3.308 billion in 2020.

Among the 2021 project awards, Traylor-Aecon General Partnership, a consortium in which

Aecon holds a 40 per cent interest, was awarded a \$288 million contract by Metro Vancouver (Greater Vancouver Water District) for the Annacis Water Supply Tunnel, Fraser River Crossing project in British Columbia.

Aecon's share of the contract will be added to its construction segment backlog in the first quarter of 2022.

Connect Cite, a general partnership in which Aecon holds a 50 per cent interest, was selected by ADM Aeroports de Montreal as the preferred proponent for the Montreal-Trudeau International Airport Reseau express metropolitain (REM) Station project in Ouebec

Finalization of the contract and financial close

are expected in the first half of 2022, when the project is also expected to be added to Aecon's backlog.

ONxpress Transportation Partners is a consortium in which Aecon holds a 50 per cent interest in a civil construction joint venture and a 28 per cent interest in a 25-year operations and maintenance partnership.

The team was identified by Metrolinx and Infrastructure Ontario as the First Negotiations Proponent for the GO Rail Expansion On-Corridor Works project in the Greater Toronto Area.

Commercial close for the On-Corridor project is expected in the coming months, with early works and a two-year collaborative development phase expected to commence in the second quarter of 2022, and operations and maintenance anticipated to commence in the second quarter of 2024.

"Aecon's 2021 results show steady revenue growth and a strong, diversified backlog at year-end," said Aecon president and CEO Jean-Louis Servranckx.

"The infrastructure market in Canada continues to be strong and we are well positioned to capitalize on this momentum. The overall outlook for 2022 is positive, supported by the strong level of backlog and new awards during 2021 and into early 2022, and the strong demand environment for Aecon's services."

The Project intent as set forth in the Consultant's Specifications and Drawings (Attachment 5), can be summarized in two (2) key objectives, as follows: 1. Objective 1: Heritage Masonry Chimney Repairs (localized work relating to flashing, coping, masonry replacement, structural stabilization, fire separation upgrades); 2. Objective 2: Masonry wall repairs (replacement of non-compacted and de-bonded hard cement mortar with lime-based mortar filling). Scope of Work: The OHT requires the services of a General Contractor to provide full-

scope general contractor services (heritage specialty) for the "Deliverables". The Project intent is to undertake restoration of heritage chimneys and an exterior masonry wall at Scotsdale Farm. Refer for the detailed tender documents for full scope of work. Total completion of the project will be June 30, 2022. Elec Eng: HL Engineers Ltd, M.J. Li, 14721 Woodbine Ave, Gormley ON LOH 1GO 905-713-0003

Toronto Community Housing Corporation (TCHC) is seeking a Vendor for the provision of construction services at 3725-3735 Dundas St. W. TCHC will be awarding all phases to the lowest total priced Proposal depending on TCHC budget availability and the contractor's performance in the phased construction project. Work under this contract is to carry out repairs to isolated areas of underground parking garage, garage roof slab as well as foundation walls, drains garage enclosure, stairs, upgrade Drop off area, and upgrade garbage compound area. This work is categorized as Structural construction. The Work for 3725 & 3735 Dundas St W. is to be completed in three (3) phases, and the Proponent must bid on all phases. Only phase one (1) shall be awarded as it has received budgetary approval. Phases two (2) and phase three (3) are tentatively expected to be awarded and completed between the years of 2023 to 2024 pending budgetary availability and contractor performance. TCHC will use this RFPQ as a method to develop and maintain a list (roster) of Vendors who meet the minimum standards to be considered for the subsequent garage restoration projects listed in Appendix A.2 - List of Locations which will work in close collaboration with TCHC to execute for select locations. This pregualification process gives the Proponent an opportunity to demonstrate their team's experience and capabilities through a set of rated criteria as set out in the RFPQ. Proponents will be evaluated based on their experience, staff qualifications and ability to deliver a high quality of services. All proponents which prequalify for the list (roster) must enter into a Roster Framework Agreement with TCHC (Appendix C). Subsequent Requests for Quotations (RFQ) will be requested from the list of prequalified Proponents for the various garage restoration projects listed as part of Appendix B.2. which TCHC anticipates will be throughout 2022 - 2024 as funding is approved. 1- Existing Roofs - Buildings 300 and 75: The existing roofs of the two buildings are being replaced, as they are original construction, and have reached the end of their functional lives. The Architectural portion of the project involves the replacement of the roofing materials (membranes and insulation) with modern, state of the industry materials and methods, to restore the water tightness of the systems. In addition, the roofing work will support the reconfiguration of the ventilation system in Building 300, by closing off a number of existing roof openings and the provision of new fan openings. 2- Existing Exhaust Fans (Eq. No's TS-DUF-TRB-EF-001 and TS-DUF-TRB-EF-002): The existing exhaust fans that ventilate the Tipping Floor are slated for removal because of their age and the accompanying concerns over their reliability. The mechanical portion of the project seeks to replace these fans with the optimal technological solution considering current standards and codes and the present condition and use of the Tipping Floor as these have changed since the existing fans were 3- Electrical Power & Control installed. Upgrades for HVAC Modifications: The roof replacement at Building 300 requires the replacement of two (2) existing exhaust fans with six (6) new roof top exhaust fans and two (2) new side wall supply fans. The electrical portion of this project involves the decommissioning of the existing fans power and controls accompanied by the corresponding provision of power and controls for the eight (8)

new units. Documents can be obtained at: http:// discovery.ariba.com/rfx/12471052 Owner does not track plan takers and/or interested bidders. If you are an interested contractor and wish to be listed as a bidder, please notify our editorial staff at research.canada@constructconnect.com

Toronto Community Housing Corporation (TCHC) is seeking a vendor for the provision of construction services for 17 Vacant Units Rehabilitation at 50 Torbolton Drive. TCHC will be awarding the project work to the lowest total priced Proposal. building has been vacant for over fifteen years. In 2021 the interior of the building was largely demolished and prepared for reconstruction. After this time, the design team reviewed the remaining conditions and updated their design accordingly. This work is categorized as holistic, Passive House renovation and reconstruction of retaining wall. The design meets Passive House Canada design practices and the construction of 50 Torbolton Drive must be certified by Passive House Canada. There is a photovoltaic array on the roof that will also classify this building as Net Zero compliant. Documents can be obtained at: https://torontohousing. bonfirehub.ca/opportunities/49856 planholders and/or interested bidders is not being tracked by the stakeholders involved with this project. If you are an interested contractor and wish to be listed as a bidder, please notify our editorial staff at addtobidlist@constructconnect.com. Q&A date march 11,2022 4:00 pm

RFQ CONSTRUCTION MANAGER - LEF QUILT ON WESTON MIXED-USE AFFORDABLE HOUSING DEVELOPMENT \$90,000,000 est **TORONTO, Toronto, ON**

Weston Rd & Somerville Ave, Toronto, M6M

TENDERS DUE, 30-Mar-22 at 5:00 PM ET. Solicitation #: 21956-001

Owner: The Learning Enrichment Foundation (LEF), 116 Industry St., York ON M6M 4L8 416-769-0830 Architect: LGA Architectural Partners, Kevin Martin, 100B-310 Spadina Avenue, Toronto ON M5T 2E8

416-203-7600 Fax: 416-203-3342 The Learning Enrichment Foundation (LEF) proposes to construct a new nineteen-storey building that will have a gross floor area of approximately 12,985 m2, plus two levels of below grade parking, located at the intersection of Weston Road and Somerville Avenue. The work will include site work including new sidewalk, driveway and landscaping. The construction value is estimated at \$90,000,000. The intent is to enter into a CCDC5B contract with a robust collaborative pre-construction service and undertake an integrated design approach with robust design assist form the Construction Manager and key subtrades/suppliers. The project is currently in the early stages of the planning approvals process with an anticipated construction start of Q4, 2024. Construction Managers interested in being pre-qualified to bid the work must submit the following: Completed CCA CCDC Document No. 11 Contractor s Qualification Resumes of management Statement to be assigned to the project. Letter from a national recognized Surety Company stating total bonding limit, current bonding committed; and confirming availability of required Bonding for this project - 50% Performance Bond and 50% Labour and Material Payment Bond. description of Contractor's Health and Safety Policy and written confirmation that all Health and Safety policies will be followed for the duration of the proj-Submissions of most recent CAD7-Calculations and Profiles issued by WSIB and CSA Indication from the proponent of any pending litigation or dispute involving the pre-qualifying Current Certificate of Insurance, minimum 3rd party liability of \$5M. 8-(3) reference project and client / consultant references from previously completed and/or presently under construction projects of similar project delivery (integrated design, design assist, design build), program (affordable housing / mixed use), scale, innovative and sustainable designs, and similar scope of work, including contact names, positions, telephone numbers and addresses. 9tify Construction Managers experience successfully working with not for profit client organizations.

Identify Construction Managers experience

with effective integration of community benefits agreements and social procurement practices used. 11- A signed disclosure of any potential conflict of interest: disclose any actual or potential conflicts of interest that may exist between your firm, its management, employees, or proposed subconsultants and LEF, management, or employees, and the nature of such conflict of interest. If a Proponent has no such conflict of interest, a statement to that effect should be included in its submission. Submissions received after closing deadline will not be accepted. LEF reserves the right to select and approve only those Construction Managers which they deem suitable for this project.

Construction start 01-0ct-24;

Bids to Role: Architect;

Doc Notes: This is for a Construction Manager prequalification submissions process only. It is too early in the process to share / publish drawings of the project.

This Request for Proposals (the "RFP") is an invitation by the University of Ottawa (the "University") to prospective proponents to submit proposals for 2020044-RFP | Access Control Integrator & Company & Comp Campus CCTV; The University of Ottawa has numerous readers Facility Commander Wnx system. The system not only controls access controlled doors, but also controls access to AV podiums, elevators, intrusion detection alarm points and some life safety alarms. The currently operated access control system at the university has reached its end of life and support for the product ceased by end of 2020. As a result, the University has initiated a process to modernize its access control infrastructure. On a high level, the replacement system was guided by the following main principles: have integration capabilities, remain a cost-effective technology, forward looking, secure, intelligent, open and flexible. This request for proposal is for all labour and material for the removal of the current Facility Commander Wnx system hardware from 42 buildings, and replacement. Official bid documents must be obtained from www.merx.com and bid submissions must be done through the Merx platform.

613-224-2353 This Request for Supplier Qualifications (RFSQ) is an invitation by the Ottawa Catholic School Board (the Purchaser, OCSB, the Board) to prospective respondents to prequalify for bidding opportunities on various Floor Replacement projects over the next five (5) years beginning 1 April 2022 to 28 February 2027. The majority of the work will be executed during the months of July and August

of each year. Some case specific work may occur during the school year at which point the schools may be occupied when the contract work takes place. It is the intention of the Board to develop a list of prequalified Flooring contractors specifically for vinvl composite tile, carpet tile, and sheet good flooring replacement projects. The RFSQ package will be available to Bidders on Thursday March 3, 2022. The package may be picked up at the Main Reception of the Ottawa Catholic School Board, 570 West Hunt Club Road, Nepean between the hours of 9:00 am and 3:30 pm. For inquiries email tony.arthur@ocsb.ca There is NO fee for the RFSQ package.

BECHTEL PARK DIAMOND REPLACEMENT \$500,000 est

WATERLOO, Waterloo, ON

185 Bridge St W, Waterloo, N2K 1K9

TENDERS DUE, 15-Mar-22 at 2:00 PM ET. Solicitation #: RFT22-06 Owner: City of Waterloo, 100 Regina St. S., Waterloo

ON N2J 4A4 519-886-1550 Fax: 519-747-8500 Land Arch: RK & Associates, 8 Gaskin Crt., Barrie ON L4N 6K2 705-791-6489

This contract consists of the renovation of an existing baseball facility at Bechtel Park. The anticipated work involved in this contract includes but is not limited to the removal and disposal of existing fencing, vegetation, and infield surfaces. The contract includes the supply and installation of new fencing and dugouts, accessible parking, concrete and asphalt paving, site grading, sodding, planting and irrigation works. Additional work may be added as budgets are available. The project will occur in conjunction with the demolition of 2 buildings on site as well as the renovation of 1 building on site. Demolition and renovation of current buildings will be done outside of this contract and all effort will be made to prevent the projects from overlapping. Bidders are asked to provide proof of ability in the form

of examples of prior projects conducted by bidder that are similar to the Bechtel diamond renovation project. Once award, the project is set to begin May 2, 2022 and substantial completion to be Oct 31, 2022. Contractors are to be aware that no work is to be done on Sundays. This site is a high traffic site for park patrons. All effort must be taken to ensure site safety at all times for patrons of the park as other elements of the park will remain open during construction. Construction of a one-storey plus basement, roughly 28,500 sq ft addition, to the existing Base Lodge along with select renovations. Project also includes demolition. The purpose of the Construction sequencing is to outline how construction should progress to accommodate the continued operation of the existing Base Lodge through the 2022/2023 ski season. .1 From May 2022 - Nov 2022 the existing Base Lodge will continue to run as it does through off season operations with occasional functions and rentals. Some service disruptions are allowable as long as they are timed and coordinated with rental functions. .2 From Dec 2022 - March 2023 the existing Base Lodge will run and operate to support the ski season. Members will require full use of the existing Base Lodge facility and the slope side exterior Ski Storage Building. No service disruptions will be allowed during the ski season. .3 From April 2023 - October 2023 the contractor will have full control of the existing Base Lodge, site and the addition, with full access to all areas of the building to complete all interior renovations, servicing connections and interior finishes. *Owner is Craigleith Ski Club. *Cost reflects approx. total project estimate.
